## **Notes:**

Performance is in Internal Throughput Rate (ITR) ratio based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput improvements equivalent to the performance ratios stated here.

IBM hardware products are manufactured from new parts, or new and serviceable used parts. Regardless, our warranty terms apply.

All customer examples cited or described in this presentation are presented as illustrations of the manner in which some customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics will vary depending on individual customer configurations and conditions.

This publication was produced in the United States. IBM may not offer the products, services or features discussed in this document in other countries, and the information may be subject to change without notice. Consult your local IBM business contact for information on the product or services available in your area.

All statements regarding IBM's future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Information about non-IBM products is obtained from the manufacturers of those products or their published announcements. IBM has not tested those products and cannot confirm the performance, compatibility, or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

Prices subject to change without notice. Contact your IBM representative or Business Partner for the most current pricing in your geography.

This presentation and the claims outlined in it were reviewed for compliance with US law. Adaptations of these claims for use in other geographies must be reviewed by the local country counsel for compliance with local laws.

# Agenda

---

- **WHAT** is Linux ?
- **WHY** should you consider Linux ?
- **WHERE** is IBM's Linux Investment going ?
- **WHO** are IBM's Linux Customers ?

# Business Week

*The Linux Uprising, March 3, 2003*

## LINUX CUTS BOTH WAYS

### THE WINNERS

**IBM** Big Blue is selling twice as many Linux servers as any other company and is well-liked by Linux developers

**INTEL** The processor giant is riding Linux into the world of high-powered computing in corporate data centers

**DELL** The thriftiness of Linux appeals to Dell, which can sell Linux servers cheaper than other major computer companies

**RED HAT** The leading seller of Linux has lined up distribution deals with just about every big computer company

### THE LOSERS

**SUN MICROSYSTEMS** Customers are abandoning its Solaris software for Linux, which performs similar tasks

**MICROSOFT** Linux wins the price war and is luring corporate customers leery of getting locked into Microsoft

**LINUX STARTUPS** Other than Red Hat, there's not much room for these small fry

**LINUX PURISTS** Linux developers who don't like the idea of working with capitalists had better get used to it

IBM

# USA Today

## Linux wins in Munich, July 14, 2003

## Linux took on Microsoft and won big in Munich

Victory could be a huge step in climb by up-and-comer

### Cover Story

By Brian Achido  
USA Today

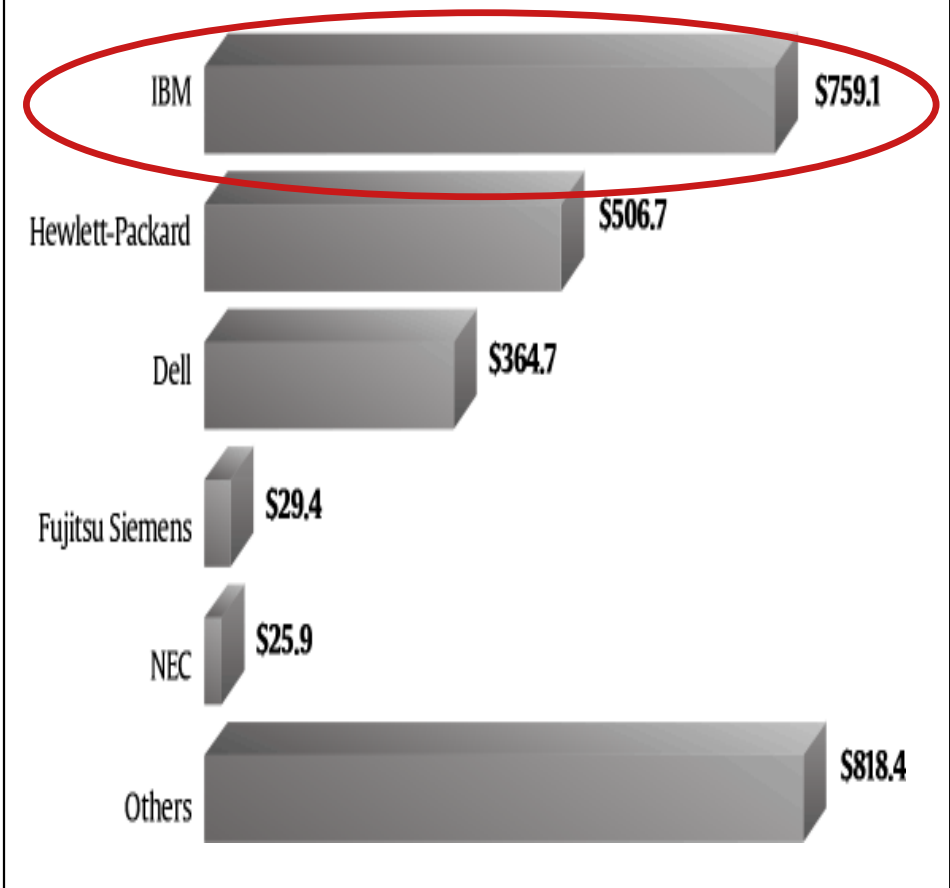

On the brink of losing a pivotal account to an ascending rival, Microsoft last March dispatched CEO Steve Ballmer to the rescue.

The German city of Munich was balking at a \$36.6 million proposal from Microsoft to upgrade 14,000 desktop PCs to the latest versions of Windows and Office.

### Leading vendors

Top five worldwide Linux vendors in 2002 (in millions of dollars):

By Robert W. Ahrens, USA TODAY

# Market Pressures

## Business Efficiency

- Process Integration
- Cost
- IT Asset Utilization

## Business Continuity

- Reliability
- Performance
- Security
- Disaster Recovery

## Open Movement

- Flexibility
- Innovation
- Standards

## Technology Substitution

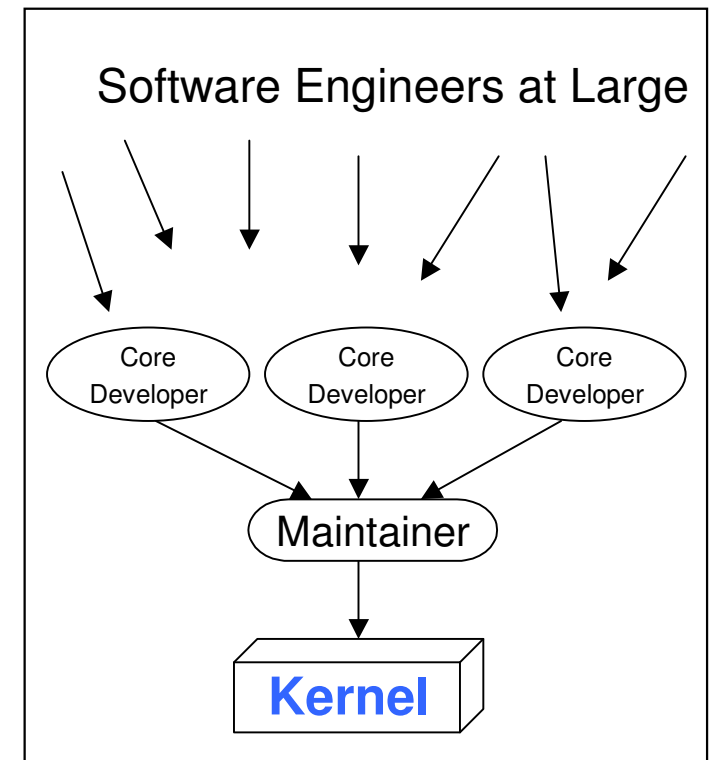

- Commoditization
- Blades
- Virtualization
- Clusters & Grids

# What is Open Source?

- Community develops, debugs, maintains
- Generally high quality, high performance software
- Superior security - on par with UNIX, superior to Windows
- Peer code reviews are Darwinian -- structured/disciplined
- More information: [www.opensource.org](http://www.opensource.org)
- Examples of Open Source Software:
  - ▶ Apache web server
  - ▶ Eclipse app development
  - ▶ Gnome desktop environment
  - ▶ Mozilla (Netscape) browser
  - ▶ Open Office (Star Office) productivity suite
  - ▶ Perl language
  - ▶ Samba file/print
  - ▶ SendMail mail server
  - ▶ Tomcat application server

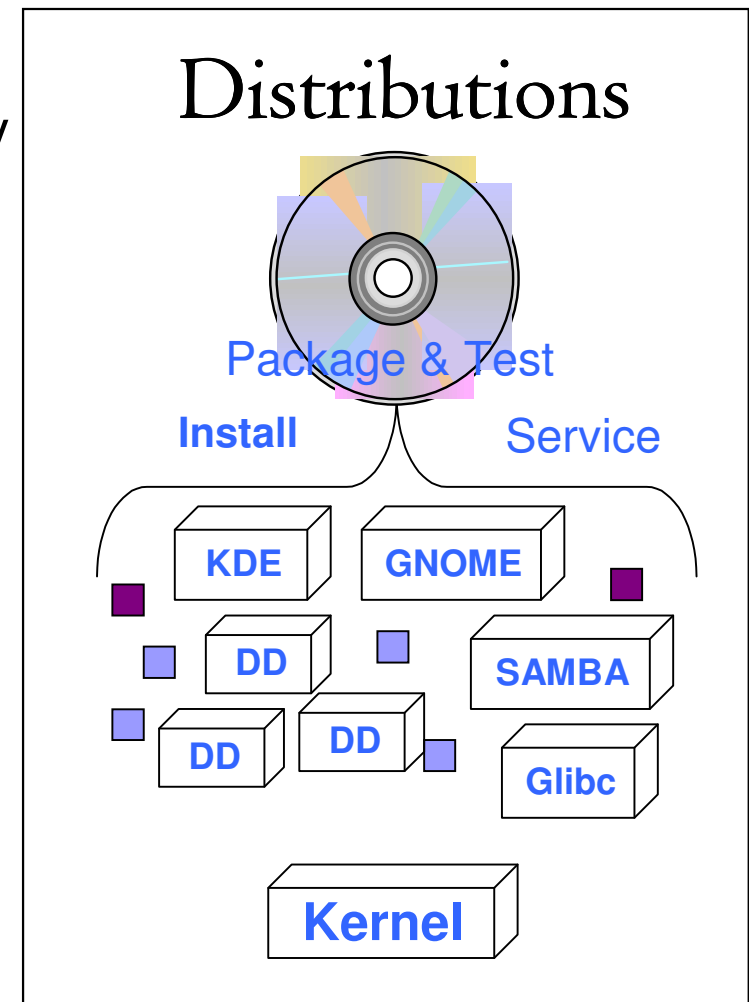

# What is Linux?

- UNIX-like operating system
- Developed/tested by the Open Source community
- Packaged and shipped by distributors
  - ▶ Red Hat
  - ▶ SUSE (Novell), Turbolinux, Conectiva
  - ▶ Other (Debian, Red Flag, Mandrake, etc...)
- Why Linux?
  - ▶ One operating system only (PDA-->Desktop-->Mainframes)
  - ▶ Basis for innovation

*"Hello everybody... I'm doing a (free) operating system (just a hobby, won't be big and professional...)."*

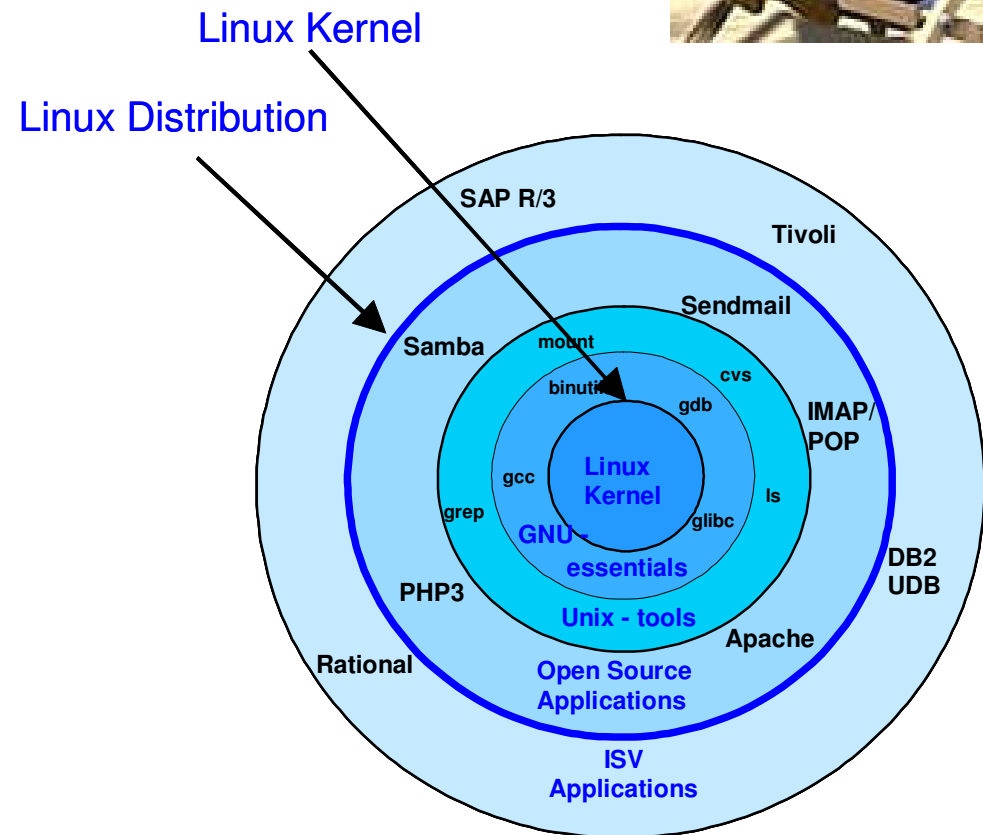

Linus Torvalds, creator of Linux, from the first Internet announcement on August 25, 1991. Even he initially underestimated its potential.

# What makes up a Linux System?

- Kernel
  - ▶ Device drivers
  - ▶ File systems
  - ▶ Network, etc.
- Systems and Tools Set
  - ▶ Command Line Interpreter (Shell)
  - ▶ Compiler, debugger, runtime library
  - ▶ File and system operations (incl. documentation), etc.
- Graphical User Interface
  - ▶ KDE
  - ▶ GNOME
- Applications (ISVs, Open Source)
  - ▶ Enterprise software
  - ▶ Internet browser
  - ▶ Office suite, etc.

# Independent Software Vendors

# Linux... Lowers Costs

---

*"Bynari Insight Server (on zSeries running Linux) gave us a more cost-effective alternative to Microsoft Exchange..."*

Dave Ennen, Technical Support Manager -- Winnebago

*"It's going to be almost 30 times cheaper to run and maintain" (than Sun systems)*

Josh Levine, Chief Administrative Officer and President - -  
e\*Trade Technologies

*"Consolidating our European systems onto iSeries and xSeries will bring significant cost savings and improved administration."  
(speaking of Linux application)*

Tim Evans, IT Manager -- Banco do Brasil

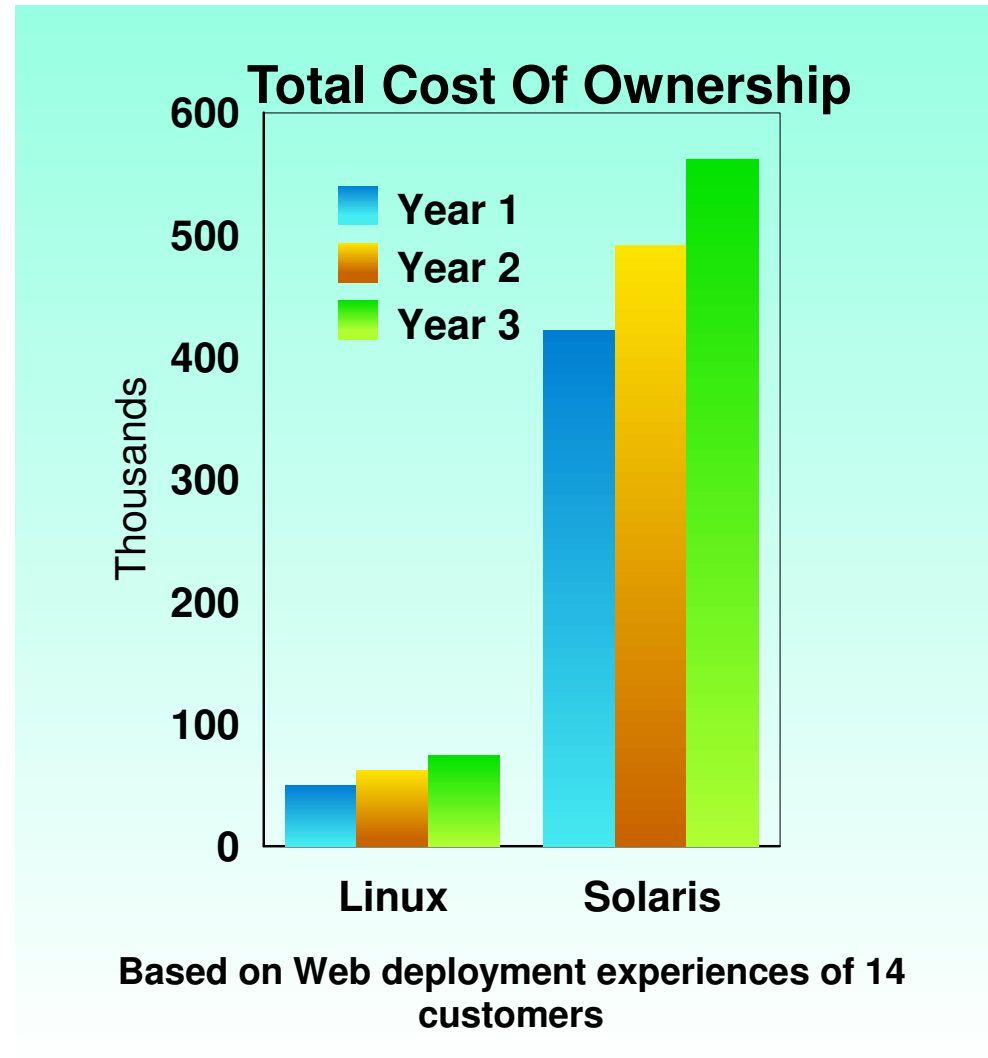

*"Linux was our first choice to run these new applications... it is easy to manage and costs less than other operation systems to implement"*

Mr. Makoto Takayama, Managing Director -- Lawson, Inc.

IBM

# Linux... It All Started With Cost Benefits

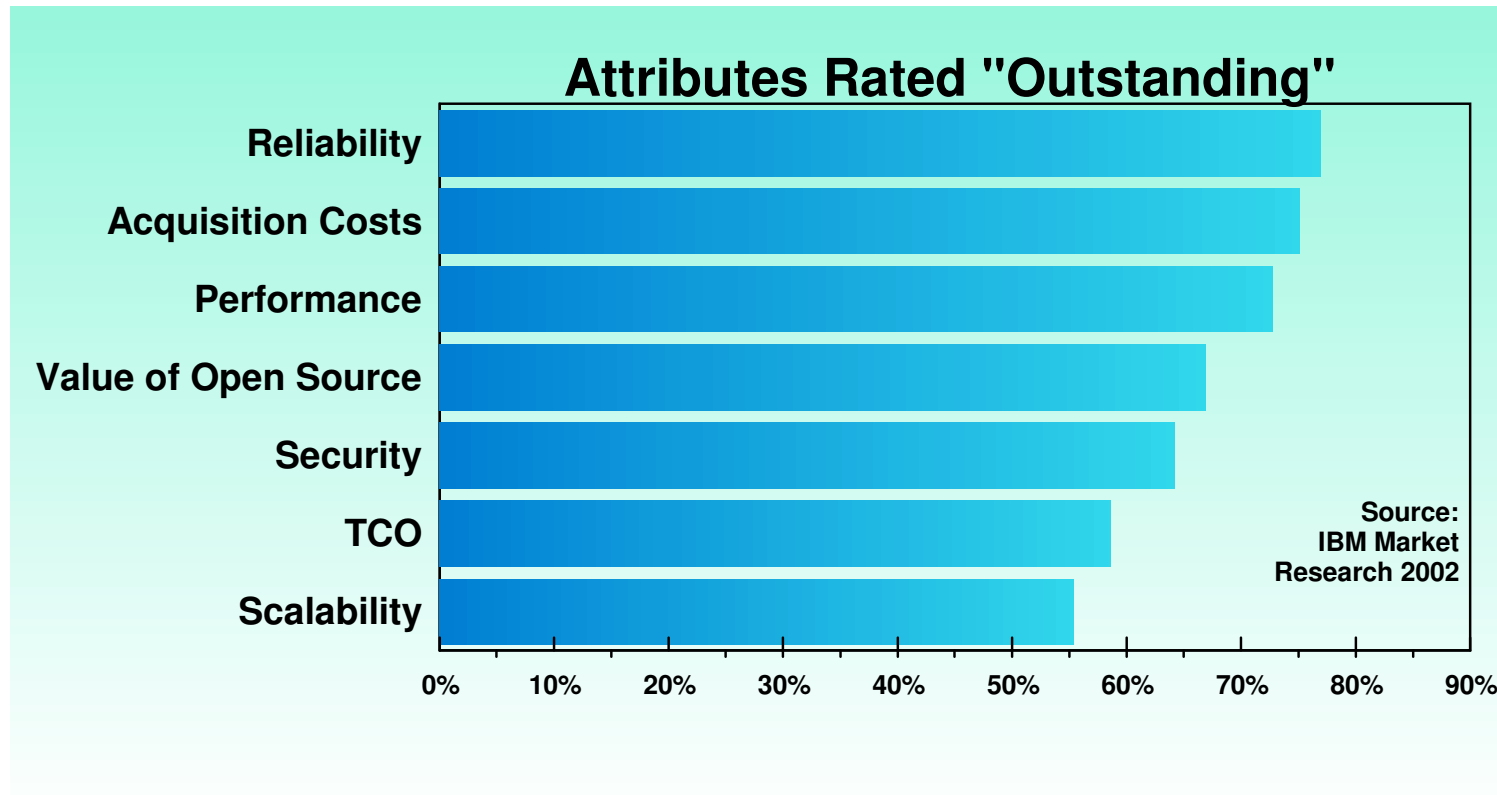

TCO (excludes middleware, application, services)  
1) OS Purchase Prices  
2) HW Purchase / Maintenance  
3) Upgrade Prices  
4) Admin costs

Based on Web deployment experiences of 14 customers

# Linux... More than Just Cost

Question: Based on what you have seen or heard so far with Linux, how would you rate Linux on the following aspects?

Note: Includes responses from 500 Linux users

# Linux... Reliable, Robust, Fast

---

*"We need a rugged, reliable technology solution for the time-sensitive, high-volume traffic in our concession stands..."*

Todd King, Vice President of Technical Information Services -  
- Regal Entertainment Group

*"We chose to deploy Linux on zSeries servers because it provides a robust platform that meets our expected growth in mission-critical applications."*

Harry Roberts, Chief Information Office, Boscov's  
Department Stores, LLC

*"...Cars+ actually runs faster on Linux, as well as being more stable. It screams along..."*

Mr. Newman Emanouel, CFO - - Thrifty Car Rental Australia

*"Sendmail running on Linux for S/390 provided improved performance and reliability."*

Donna Lamberth, Senior Manager for IS - - L.L. Bean

# Linux Market Broadening

## Market

- Increased industry focus
- Standardization increasing
- Growing ISV support
- Analysts endorsement strengthening

## Customers

- Industry adoption expanding
- Workload usage maturing
- Governments endorsing Linux

## Technology

- 2-way → 8-way
- Blade acceleration
- "Carrier-grade"
- 2.6 Kernel due 1H 2004 (16-way)
- Client functionality

IBM

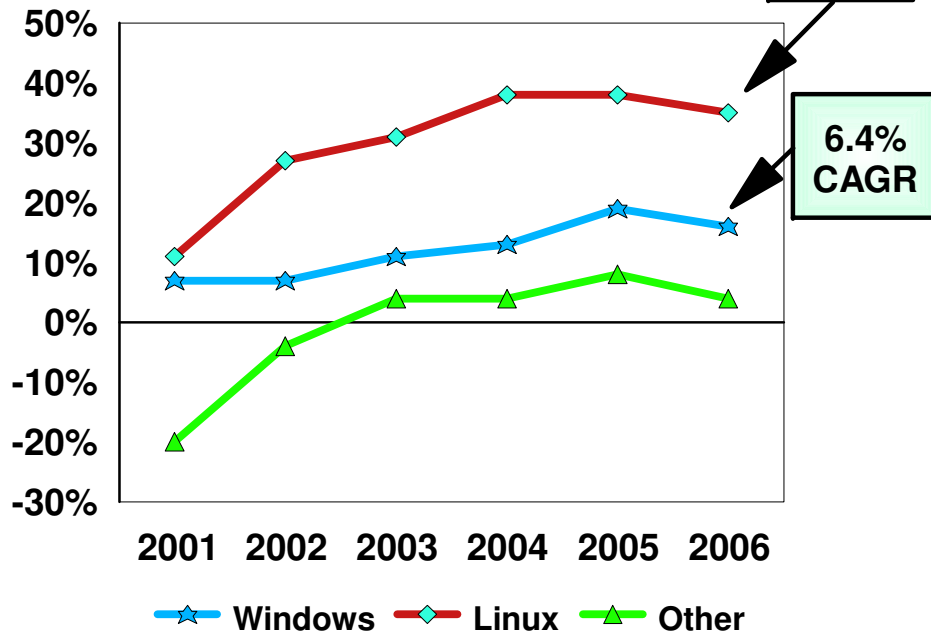

# Linux is gaining Enterprise Acceptance

Greater than 5X growth of Windows & represents 25% of total server shipments by 2006

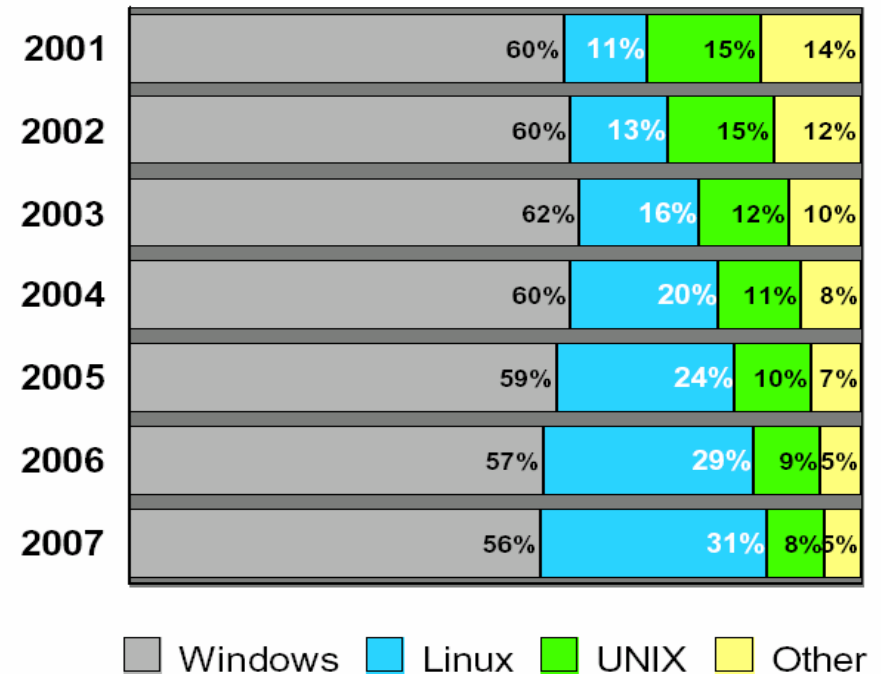

Linux has substantially grown market share

Server Shipments  
% Unit YtY Growth

# Comprehensive IBM Linux Investments

## Application Development

- Eclipse
  - Open source IDE framework
- WebSphere Studio
- Speedstart
- developerWorks
- Linux hubs in US, Korea, and Germany

## Porting & Prototyping

- Executive Briefing Centers
- Linux Server Dev. Labs
- Linux Integration Centers
- Linux Porting Centers
- Linux Centers of Competency
  - some dedicated to Finance Sector
- Linux for Service Providers Lab
- Linux Design & Solutions Center

## Enterprise Linux

- Linux Technology Center
  - "Help make Linux better"
  - "Expand Linux Reach"
  - "Advantage IBM Products"
- Open Source Development Lab
  - Enabling Linux and Linux-based applications for data center and carrier-class deployment

## Comprehensive Product Enablement

- eServer Platforms
- IBM Middleware
- IGS Services
- on demand Linux services

## @server zSeries

- I/O intensive application
- Application needs "mainframe features"
- Large number of parallel servers (horizontal)
- Most advanced workload management

## @server pSeries

- 64-bit performance (e.g. floating point, large memory)
- Single server multiple applications
- Linux and AIX configurations

## Linux Virtual Services

- on demand capacity
- Fast deployment
- No capital expense
- Pay for what you use

Introducing the **Next Utility.**

**@business on demand.**

## @server BladeCenter

- Scale out and clustered solutions
- Shared infrastructure with no single point of failure
- Flexible architecture supports range of servers - Intel, PowerPC
- Integrated management

## @server xSeries

- Leading low- to mid-range price/performance
- Cluster scalability
- Linux and Windows environments

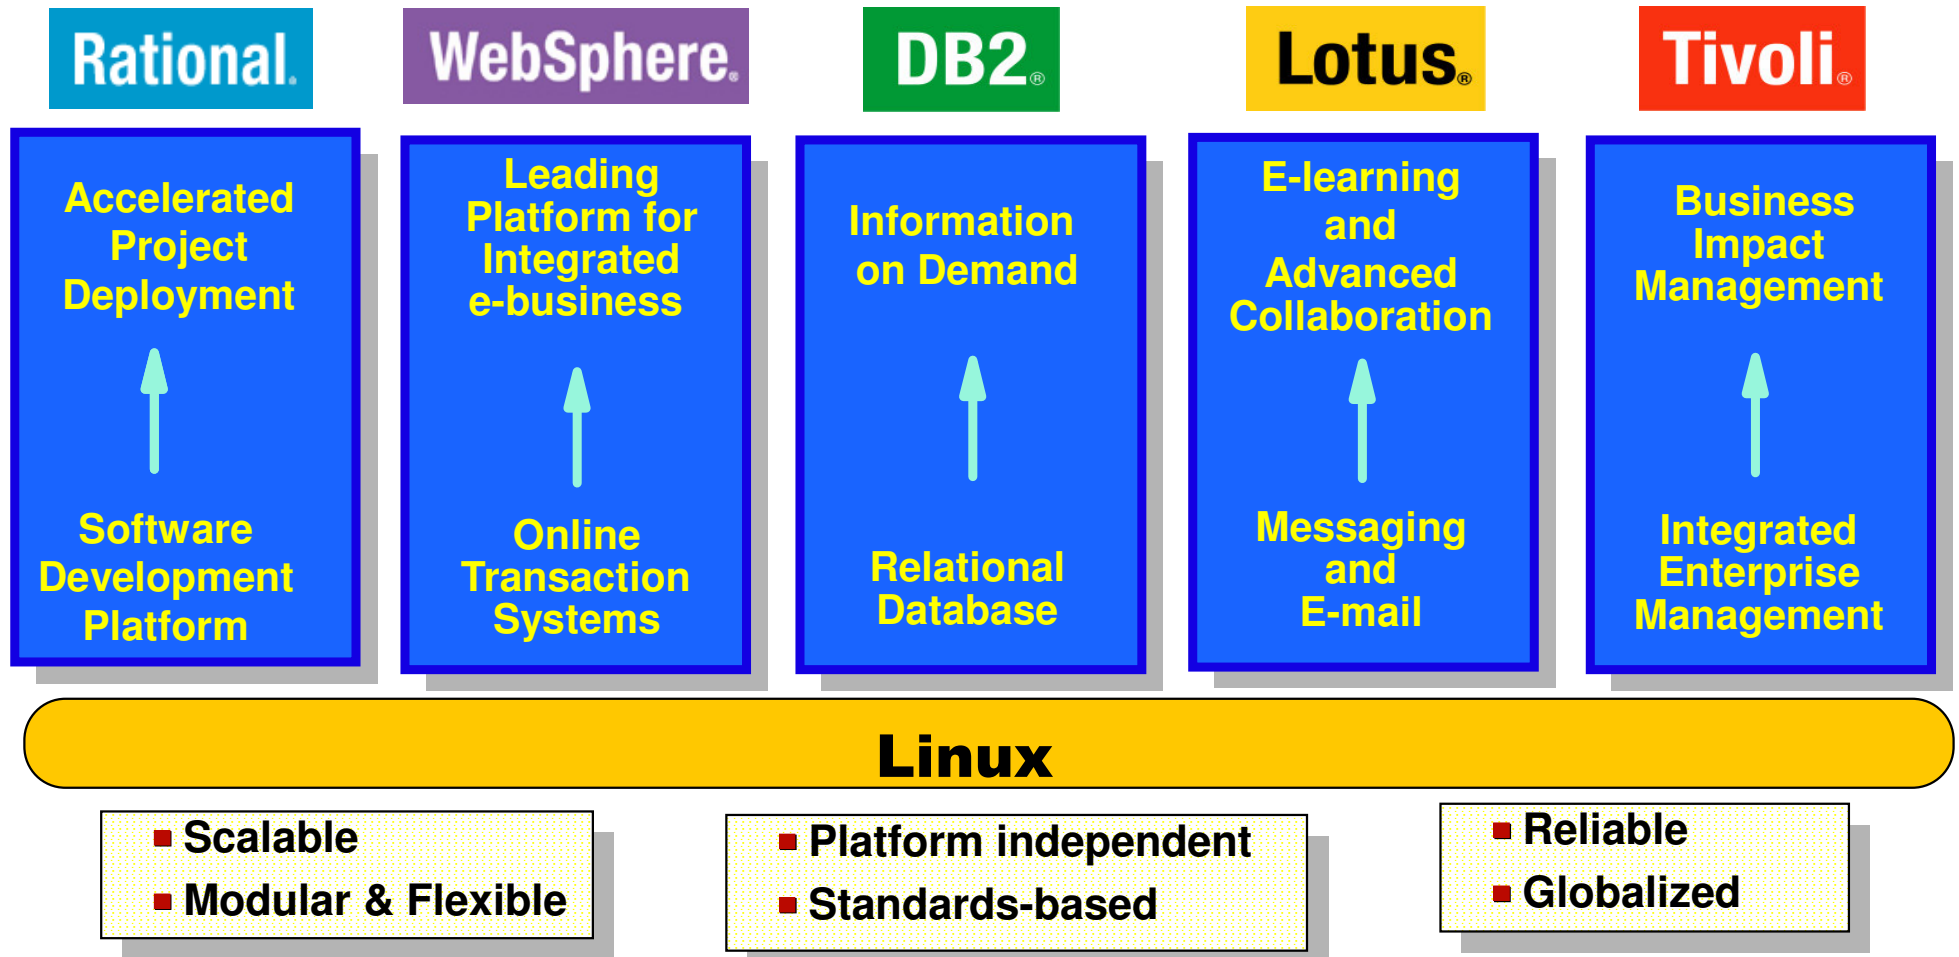

## @server iSeries

- Small or medium business
- Fully integrated solution (hardware, software, networking)
- Infrastructure consolidation
- Easy administration / operation

# IBM Software

*Delivering Business Capabilities via Leadership Brands*

# IGS Linux Services

## Technical Support

- 24/7 Support Line
- Advanced Support
- Red Hat & SUSE support
- All eServers including clusters & blades

## Training

- 5 languages; 20 countries
- all eServers
- Web-based & classroom
- Certifications

## Application Solutions

- Application Strategy Workshop
- DB2
- WebSphere Advance Server
- MQSeries
- ISVs
- QuickStarts
- Application development

## Clusters

- Cluster Strategy Workshop
- x1350 Installations
- OEM Procurement
- Hardware Setup
- Software Installation
- "Roll Your Own"
- Infrastructure Design Services

## Infrastructure Solutions

- Linux Infrastructure Workshop
- Linux Hosting & Out Sourcing
- e-Sourcing
- Linux Virtual Services

## Distributed Enterprise

- POS
- In store systems
- Kiosks
- ATM's

## Workload Consolidation

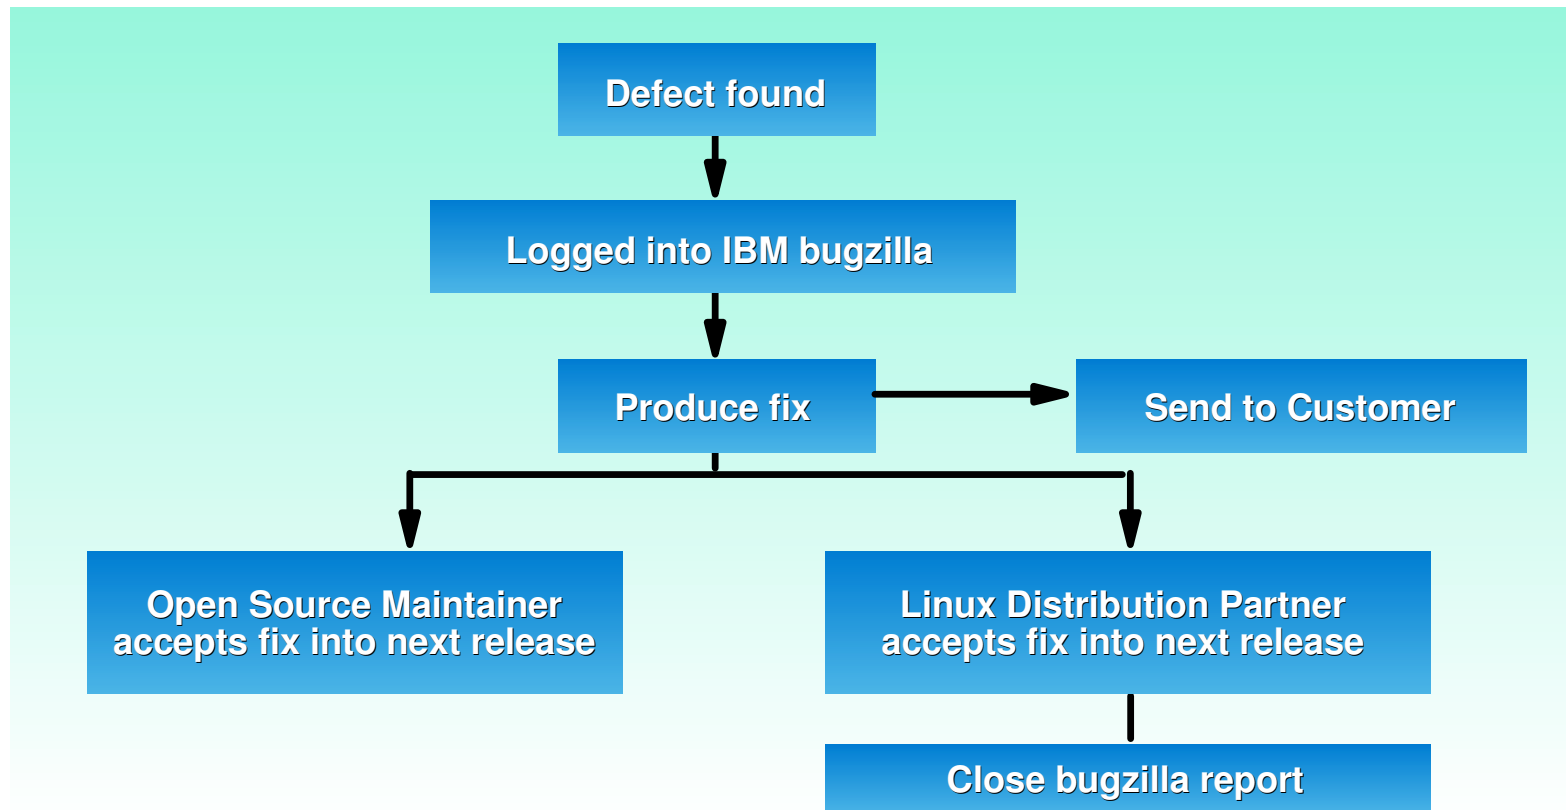

- Workload Consolidation on Linux Workshop
- File/Print, Webserving
- Application Porting
- Server Consolidation
- MS Exchange Consolidation

# IBM Level 1-2-3 Linux Support

## *Open Source Involvement Benefits Our Customers*

- LTC and IGS teams have experts in every key Linux subsystem and can respond to any problem
- IBM works directly with the code owners to integrate fixes into the base quickly and efficiently

# IBM Uses Linux

## *Transforming IBM's IT infrastructure - \$10M+ in Savings*

- 2,100+ Production Servers WW
  - ▶ excludes research and development !
- [www.ibm.com/linux](http://www.ibm.com/linux) & [w3.ibm.com/linux](http://w3.ibm.com/linux)
  - ▶ redundant xSeries Linux servers
- Intranet search engine
  - ▶ xSeries servers; Inktomi search engine
- IGS Internet Vulnerability Security Scanning
  - ▶ 100 xSeries scanning 30,000+ IP addresses/week
- Performance monitoring
  - ▶ 75% fewer Linux servers than NT servers for same workload
- IBM Global e-Mail Anti-virus Management
  - ▶ xSeries scans incoming/outgoing mail for viruses
- Microelectronics 300mm Wafer Manufacturing
  - ▶ Much more reliable than Windows
- Workstation Asset Management Applications
  - ▶ 4 Linux zVM Guests on zSeries server
  - ▶ Variable workload / on demand capacity

IBM

# IBM's 300mm Wafer Facility

- Background:
  - ▶ US \$2.9B 140,000 sq foot facility
  - ▶ Largest single investment in IBM's history
  - ▶ Largest private investment in NY state's history
- Challenge:
  - ▶ 60 x 60 x 24 x 365 automation
  - ▶ 300 machines in constant communication
  - ▶ Ten fold more complex than normal manufacturing
- The evaluation:
  - ▶ 90 day test
  - ▶ Windows - performance degradation in 6-7 days and outages in 10 days
  - ▶ Linux - no issues left it running for 5 months
- The proof:
  - ▶ Not one single failure to date (18 months)

## Perry Hartswick, IBM Manager of 300mm Systems

→ "...just for fun, we kept the Linux experiment running to see what would happen. We finally shut it off after 5 months, and it was still running like a clock."

# IBM Customers Running Linux

## Financial/Insurance Services

## Communications

## Education/Government/Health

## Distribution/Retail

## Industrial

IBM

# Charles Schwab

---

## *Wealth Management on GRID and Linux*

### Challenge

- Utilize existing server "white space" for real-time portfolio analysis
- Solution must be Linux enabled for Open Standards
- No new hardware!

### Solution

- GRID computing infrastructure exploiting Linux & DataSynapse

### Benefits

- Wealth Management application processing time reduced by 90%
  - from 4 Minutes to 15 Seconds
- Improved real-time portfolio analysis for Charles Schwab financial advisors
  - Can respond while customers are on the phone!

*charles* SCHWAB

# E\*TRADE

## *Sun Migration Increases Performance Twofold*

### Challenge

- Reduce cost, improve performance, guarantee scalability
- With 10,000 concurrent users and four million accounts, E\*Trade Financial's success depends on its ability to provide superb customer service

### Solution

- IBM @server xSeries 330 servers running Linux
- Apache webserver
- IGS prototyping and porting services

### Benefits

- 50% in cost savings
  - Millions of dollars

Our new IBM @server xSeries servers are four times faster than the ones we replaced.

Josh Levine  
CIO, E\*TRADE GROUP, Inc.

IBM

# HSBC Trinkaus & Burkhardt

## *New Front-end Access to Legacy Data*

### ■ Challenge

- ▶ Implementing new system for securities execution and settlement
- ▶ Needed Web access to ISV application DB on OS/390 for master account data administration

### ■ Solution

- ▶ WebSphere on Linux on zSeries hosting Java Servlets
- ▶ DB2 Connect access over HiperSockets to OS/390 DB2 Stored Procedure
- ▶ Looking at Samba File and Print and ISV applications for Linux on zSeries

### ■ Benefits

- ▶ The solution provides cost efficiency, manageability, scalability and ease of system integration
- ▶ The IBM mainframe strengths of reliability, availability and security combined with Linux on zSeries has solidified zSeries as the platform of choice
- ▶ HSBC is now positioned to take advantage of Open Source software, providing additional savings in the future

The IBM logo, consisting of the letters "IBM" in a bold, white, sans-serif font, set against a blue background.

# Deutsche Bank (Global Markets UK)

## *Linux Cluster Dramatically Improves Responsiveness*

### Challenge

- Reduce time to calculate Profit and Loss, and Market Value at Risk
- Long job times potentially impact following day's business

### Solution

- IBM @server xSeries Linux High-Performance-Cluster
  - 40 xSeries 330 Servers
  - 224 blade servers
- Ported home grown banking application (DBAnalytics)

### Benefits

- Reduced batch time from 8+ hours to 20 minutes
- P&L calculation now occurs during same workday, increasing responsiveness
- Significant cost savings

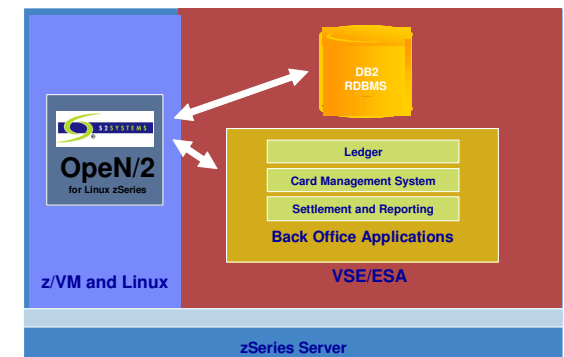

# America First Credit Union

## Challenge

- Legislation in Utah has prevented credit unions from establishing new branches to facilitate growth
- To surmount this obstacle, AFCU developed a wide range of online services
- They foresaw vigorous growth in both, number of applications and member volumes

## Solution

- AFCU created an on demand infrastructure
- Application Suite from S2 Systems on z800 running z/VM, Linux, and VSE/ESA to host the teller and loan system
- Storage support is provided by a SAN based on ESS

## Benefits

- Open Standards allow AFCU to more efficiently deploy new applications in response to customer demands - without investing in new hardware
- zSeries virtualization enables on-the-fly creation of virtual Linux servers

# Elektro-Material AG

## Challenge

- Consolidate IT environment
  - 10x AS/400
  - several Dell
- Improve processes and response times
  - Business to Business
  - internal
- Introduce a customer portal
  - Business to Consumer
  - external

LPAR1 OS/400 Managed Storage	LPAR2 Linux e-mail Server	LPAR3 Linux File Server	LPAR4 Linux Proxy Server
---------------------------------------	------------------------------------	----------------------------------	-----------------------------------

## Solution

- IBM iSeries 820 and OS/400 for standard applications
- Consolidation of Linux Intel servers in LPARs for proxy servers, e-mail servers, and file/print servers

## Benefits

- Significant savings with administration, floor space, energy consumption

# Eberspächer

## *Technology overhaul drives more efficient collaboration*

### Challenge

- Optimize IT infrastructure
- Reduce TCO in SAP environment
- Very high reliability, especially when used globally

### Solution

- IBM @server zSeries z900-103 with 3 Linux processors
- SAP R/3 Application Server on Linux for zSeries and DB2 on z/OS.e
- Inclusion of Samba as file server and for authentication (Primary Domain Controller)

### Benefits

- 40% savings in license costs due to Linux
- Improved response times and higher stability
- Linux on zSeries used as boot server for 120 Thin Clients

# Schwäbisch Hall

## *From Microsoft to Linux Clients*

### Why?

- Dramatic decline in the city's tax income
- Old hardware, not suitable for Windows XP
- Need to upgrade NT clients and exchange servers
- Heterogeneous IT environments with mail servers, file servers, firewalls, application servers, etc.

### Roadmap

- Oct. 2002: Meeting at LinuxWorld Expo
- Nov. 2002: Project kick-off
- Dec. 2002: Project plan available
- Jan. 2003: Start server installations as well as profiling clients
- xxx. 2004: Linux client for each end-user

# Schwäbisch Hall (cntd.)

# Linux Web Portal

*ibm.com/linux*

The screenshot shows the IBM Linux Web Portal homepage. At the top left is the IBM logo. To its right is a search bar with a 'Search' button. Below the search bar is a navigation menu with links for 'Home', 'Products & services', 'Support & downloads', and 'My account'. On the left side, there is a sidebar with a 'Select a country' dropdown and a list of categories: 'Linux at IBM', 'Shop the Linux store', 'Industries', 'Medium business', 'Developers', 'Pervasive', 'PartnerWorld Linux Lens', 'Education', 'Events', 'Geographies', 'Downloads', 'News', 'Services', 'Case Studies', 'Linux links', 'Archive', and 'What's New'. The main content area features a large banner with the text 'Linux at IBM' and a small Linux penguin icon. Below the banner, there is a paragraph of text about Linux's stability and security, followed by a link to 'The Linux Line'. To the right of this text is a 'Powered by' section with a Linux penguin icon. Below the main text are four columns of featured topics and solutions, each with an icon and a brief description. The first column is 'Featured topics and solutions' with sub-sections: 'Special Report' (Business Week covers the ever-growing Linux revolution), 'Total cost of ownership' (Find out what you could be saving with IBM eServer and Linux solutions), 'e-business on demand' (Use virtual hosting to tap into managed server capacity - without the upfront expense of buying the physical hardware), and 'Server consolidation' (Reduce total cost of hardware and operating systems ownership). The second column is 'Linux Hardware' with links to 'Linux on @server', 'IBM Linux Clusters', 'Storage products', and 'Personal Systems'. The third column is 'Software for Linux' with links to 'IBM software' and 'Partner software'. The fourth column is 'Linux Services' with links to 'Service offerings' and 'Server capacity on demand'. On the right side of the main content area, there are three sections: 'Featured Event' (LinuxWorld Conference & Expo Tokyo - May 21-23, 2003), 'Golf on demand' (TOURCast will provide real-time coverage of PGA golf on Linux... register now), and 'Linux resource partners' (Database Trends and Applications, ePromag.com, iSeries Network, InformIT).

# Summary: The IBM Linux Strategy

---

- Fully *participate in the evolution of Linux* through open source submission of IBM developed technologies and by partnering with the OSC to enhance Linux
- Create a *pervasive application development and deployment environment* built on Linux
- Produce an *industry-leading product line* built to run Linux and Linux applications optimally
- Ensure that all *IBM operating environments have Linux affinity* that fully supports Linux, coexistence with Linux or compatibility with Linux interfaces
- Create *bundled offerings* including hardware, software, and services built on Linux

# Questions
