Macintosh II Portrait Display Video Card and Expansion Kit

Overview

The Macintosh® II Portrait Display Video Card provides the interface between the Apple® Macintosh Portrait Display and the Macintosh II computer. It allows for true gray-scaling, displaying as many as four levels of gray at the same time.

The optional Macintosh II Video Card Expansion Kit can increase the display capabilities of your portrait display to 16 gray levels.

Macintosh II Portrait Display Video Card and Expansion Kit

Product Details
Software-selectable display modes
Using the Control Panel desk accessory, you can set the Macintosh II Portrait Display Video Card to display 1 or 2 bits per pixel. This provides, respectively, 2 or 4 gray levels on the portrait display.

The ability to set a two-level display ensures that monochromatic Macintosh applications can operate as quickly as possible.

Optional 4-bit upgrade
The Macintosh II Portrait Display Video Card has a display capability of 2 bits per pixel. Upgrading this to a 4-bit-per-pixel display with the Video Card Expansion Kit lets you view up to 16 gray levels on your monitor's screen. The upgrade consists of eight video RAM chips, which fit into sockets on the Macintosh II Portrait Display Video Card.

System Requirements
To use the Macintosh II Portrait Display Video Card, you need:

- A Macintosh II personal computer with an available NuBus slot

Technical Specifications

Interface
- NuBus—plugs into any Macintosh II slot

Output signals
- Modes: RGB (analog) and gray scale
- Video: RS-343 standard and RS-170 timing-standard interlaced video
- Sync: separate horizontal and vertical sync, negative-going, TTL

Connector
- D-style with three internal coaxial connectors and 10 pins

Display modes
- 1 or 2 bits per pixel (2 or 4 gray levels)
- Upgradable to 4 bits per pixel (16 gray levels) with the Macintosh II Video Card Expansion Kit

Raster rates
- Vertical: 75 hertz
- Horizontal: 68.9 kilohertz

Power consumption
- 10 watts

Ordering Information

Macintosh II Portrait Display Video Card
Order No. M0119

With your order, you’ll receive:
- Macintosh II Portrait Display Video Card
- Limited warranty statement

Macintosh II Video Card Expansion Kit*
Order No. M0213

With your order, you’ll receive:
- Expansion kit—eight video RAM chips
- Limited warranty statement

*Dealer installation is required.
