The Apple Workgroup Server 95 has the performance, reliability, scalability, and manageability you need to meet file and print or database server requirements for large workgroups. The most powerful and expandable member of Apple’s server family, this system is based on the 33-megahertz Motorola 68040 microprocessor and offers SCSI-DMA support, parity memory, and a large second-level 68040 memory cache. These hardware features are especially important for a high-performance server. This hardware is driven by a highly-tuned server version of A/UX, Apple’s implementation of the multitasking UNIX® operating system, enabling the system to deliver high performance network services to data-intensive workgroups of up to 50 active users.

Apple servers continue the “plug and play” tradition established by the Macintosh. Installation takes just minutes, and because it’s a snap to maintain, reconfigure, and expand, over the long run the Apple Workgroup Server 95 offers the lowest cost of ownership in its class. Every system ships with a powerful yet easy-to-use backup utility that quickly backs up server data on the optional internal DDS-DC 4mm tape drive. (The optional internal DDS-DC drive is included in the configuration pictured above.) A key lock switch is included to secure your server.

You can expand the server’s power and capabilities by adding SCSI devices, increasing DRAM, and increasing the second-level memory cache. The server can quickly and flexibly grow to meet additional demands.

To provide file and print or database server resources for demanding desktop-publishing, business-administration, information-access, or document-management requirements, build your solutions around the Apple Workgroup Server 95.

---

**Apple Workgroup Server 95 Features**

**Power and speed**
- 33 MHz 68040 microprocessor
- 16 MB of RAM, expandable to 256 MB
- 128 KB of cache, expandable to 512 KB

**Expansion**
- Ten built-in ports for peripherals
- Up to four internal storage devices, 20 SCSI devices total
- Five NuBus expansion slots

**Display**
- Built-in support for all Apple monitors
- Up to 32 bits per pixel for true color

**Usability**
- Easy to set up, learn, and use

**System software**
- A/UX, a complete, industry-standard version of the UNIX operating system with Macintosh System 7 features and interface

**Networking**
- Built-in AppleTalk capability
- On-board Ethernet capability

**Compatibility**
- Macintosh, MS-DOS, OS/2, and ProDOS floppy disk formats
Technical Specifications

Microprocessor
- MC68040, 32-bit architecture, running at 33 MHz clock speed
- Integral Paged Memory Management Unit (PMMU), Floating Point Unit (FPU), and 8K-cache architecture

Memory
- Comes with 16 MB of parity RAM standard and 12 MB SIMMs (Single Inline Memory Modules)
- Expands to up to 256 MB of RAM through installation of 16 MB SIMMs in the empty slots and replacement of existing 4 MB SIMMs with 16 MB RAM chips
- 128K second-level 68040 memory cache on board, expandable to 512K

Operating System
- Version of multitasking, industry-standard UNIX operating system
- Performance-tuned for file and database services (including asynchronous I/O and SCSI DMA driver support)

Mass storage devices
- Built-in Apple SuperDrive 1.4 MB floppy disk drive
- Support for up to three additional internal devices, such as a DDS-DC 4mm tape drive, CD-ROM drive, or Apple SCSI hard disk drive
- Supports other non-Apple monitors, including some 19”, VGA, SVGA, NTSC, and PAL

Video RAM (VRAM)
- Can support up to 2 MB
- 1 MB standard supports:
  - 32,768 colors on the Macintosh 12-inch RGB Display
  - 256 colors on the AppleColor High-Resolution RGB Display (13”), Macintosh Color Display (14”), and Macintosh 16” Color Display
  - 256 shades of gray on the Macintosh Portrait Display (13”)
  - 16 colors on the Macintosh 21” Color Display

Interfaces
- One Apple Desktop Bus (ADB) port, supporting a keyboard, mouse, and other devices daisy-chained through a synchronous serial bus
- Two serial (RS-232/RS-422) ports, 230.4 Kbit/sec, maximum (up to 1.2K sold separately, if clocked externally)
- Two SCSI DMA channels, four SCSI bus interfaceable:
- Video port to support RGB and monochrome monitors of various sizes and resolutions
- Five internal NuBus expansion slots (one used by PDS card)
- Sound input port for monaural sound input
- Dual mono line input ports
- AAUI Ethernet connector

Video display
- Supports Apple monochrome and color monitors, including:
  - Macintosh 12” RGB Display
  - Macintosh 12” Monochrome Display
  - AppleColor High-Resolution RGB Monitor
  - Macintosh Portrait Display
  - Macintosh 16” Color Display
  - Macintosh Two-Page Monochrome Monitor
  - Macintosh 21” Color Display
- Supports other non-Apple monitors, including some 19”, VGA, SVGA, NTSC, and PAL

Keyboard and mouse
- Supports all Apple Desktop Bus keyboards
- Apple Desktop Bus Mouse II

Clock/calendar
- Custom chip with long-life lithium battery

Electrical requirements
- Line voltage: 100 to 240 V AC, RMS automatically configured
- Frequency: 50 to 60 Hz, single phase
- Power: 303 W maximum, not including display power

ADB power requirements
- Maximum current draw for all ADB devices: 500 mA (recommended maximum of three ADB devices)
- Mouse draws 80 mA
- Keyboard draws 25 to 80 mA, depending on the keyboard model used

Operating environment
- Operating temperature: 50° F to 104° F (10° C to 40° C)
- Storage temperature: –40° F to 116.6° F (–40° C to 47° C)
- Relative humidity: 20% to 80% noncondensing
- Maximum altitude: 10,000 ft. (3,048 m)

Size and weight
Main unit:
- Height: 18.6 in. (47.3 cm)
- Width: 8.9 in. (22.4 cm)
- Depth: 20.6 in. (52.3 cm)
- Weight: 36 lb. 12 oz. (16.7 kg)*

Mouse:
- Height: 1.3 in. (3.3 cm)
- Width: 2.4 in. (6.2 cm)
- Depth: 4.2 in. (10.7 cm)
- Weight: 4.0 oz. (0.10 kg)

*Weight will be greater with internal hard disks and additional internal storage devices.

Video display
- Supports Apple monochrome and color monitors, including:
  - Macintosh 12” RGB Display
  - Macintosh 12” Monochrome Display
  - AppleColor High-Resolution RGB Monitor
  - Macintosh Portrait Display
  - Macintosh 16” Color Display
  - Macintosh Two-Page Monochrome Monitor
  - Macintosh 21” Color Display
- Supports other non-Apple monitors, including some 19”, VGA, SVGA, NTSC, and PAL

Video RAM (VRAM)
- Can support up to 2 MB
- 1 MB standard supports:
  - 32,768 colors on the Macintosh 12-inch RGB Display
  - 256 colors on the AppleColor High-Resolution RGB Display (13”), Macintosh Color Display (14”), and Macintosh 16” Color Display
  - 256 shades of gray on the Macintosh Portrait Display (13”)
  - 16 colors on the Macintosh 21” Color Display

Keyboard and mouse
- Supports all Apple Desktop Bus keyboards
- Apple Desktop Bus Mouse II

Clock/calendar
- Custom chip with long-life lithium battery
