This Application guide contains certain information on software applications which may be available through independent third party developers or suppliers, and which the developers or suppliers claim may be used in the Nokia 9110 Communicator platform. The information contained in this catalogue is for reference purposes only, and should not be relied upon without prior consultation in each case with the respective developer and, if applicable, supplier. Nokia provides the information in this catalogue "as is", and makes no representations or warranties, whether express or implied, including, but not limited to, the warranties of merchantability and of fitness for a particular purpose, relating to the software applications referred to herein or the functionality, use or application thereof. Furthermore, Nokia accepts no responsibility for the developers or suppliers, any statements or representations made by them, or their sales, distribution, and support responsibilities in relation to the software applications.

The list of software applications contained in this catalogue is not intended to be comprehensive, and is subject to change by Nokia without notice.

Foreword

This is the Application guide (version 3.0) for Nokia’s communicators; Nokia 9110 Communicator, Nokia 9000 Communicator and Nokia 9000 Communicator.

Nokia has designed the present Nokia communicator family to be an open platform. It means that 3rd party developers can create new applications for the communicator products of Nokia listed below. This allows Nokia’s communicators to be tailored to the specific needs of the users and adds more value to the products.

This Application guide lists 3rd party applications offered for the users of Nokia’s communicators by their developers at the time of the publication of this guide.

In this guide the applications are grouped into 6 categories:

• Office
• Communications
• Internet
• Special solutions
• Games
• Hardware compatibility

The last section is Contacts, where the contact information (such as addresses, telephone numbers, e-mail- and web site addresses) of the listed 3rd party application developers can be found.

The role of Nokia has been to collect information from the developers and publish it in this Application guide in an agreed unified format. Each 3rd party application developer is responsible for the application product, its sales, distribution and support. Please see Nokia’s disclaimer preceding this foreword for further information.

To help users identify those applications that have been tested by an independent test laboratory to interface with one or more Nokia’s communicator models, Nokia has given the option to such 3rd party developers to apply for a license to use the Nokia OK Logo. In this Application guide, those applications that are licensed to use the Nokia OK Logo, have the logo printed next to them.

The Nokia Communicator Friendly Site Program is targeted to those, who offer Nokia Communicator optimized WWW services. Several companies have already joined and links to their services can be found from Nokia Communicator Optimized Web Services list in Forum Nokia.

Nokia Communicators Developer Info

If you have an application for Nokia’s communicators and you would like it to be added to the next version of this guide, please contact Nokia Mobile Phones by sending e-mail to the address:

communicator.developer@nokia.com

The further information about Nokia Communicators Developer Info, Nokia OK Logo Program and Nokia Communicator Friendly Site Program is in the web site of Nokia:

BCalc

BCalc is a simple calculator. It does everything that the build-in calculator in Nokia Communicator does, and more. BCalc has also a memory-function.

More information: http://www.bbbs.net/nokia
Contact details: see page 69

Breadbox Fax Converter

Fax Converter
Take it off! Take it all off! Make room on your Nokia Communicator! You no longer need to keep faxes stored on your Nokia Communicator sucking up valuable memory! No need for an infra-red printer to print a fax! Quickly transfer converted fax files to your favorite desktop program for viewing, printing or storing. Choose from either .GIF or .PCX formats. Transfer the original fax files to your PC and store there for later use on your Nokia Communicator if necessary.

Finally get control of your Received Faxes. The Breadbox Fax Converter makes it easy to convert Received Faxes to either .GIF or .PCX graphic files for quick transfer to your PC using NServer and the standard Nokia serial cable. Fax Converter will handle both one page or multi-page faxes flawlessly. Order your copy today!

More information: http://www.breadbox.com
Contact details: see page 68
Breadbox NBase2

NBase2 is a simple, yet flexible database for the Nokia 9000/9110 Communicator. With features such as user definable fields and fast record look up, this application is a MUST have for those who want a simple to use, yet flexible database for their Nokia Communicator.

More information: http://www.breadbox.com
Contact details: see page 68

Breadbox NBasePro

Breadbox NBasePro - a great new professional tool for companies with employees and representatives on the road that need to quickly transmit information from a database back to the home office or any other location that can accept fax or email correspondence. A perfect solution for any sales force, utility meter readers, data collectors, etc. Breadbox NBasePro contains many easy to use features including:

- Up to 40 fields per record and up to 250 characters per field
- Instantly turn any record in the database into a report and immediately Fax or Email the report right from the Nokia Communicator
- Field names can be modified by user

Imports .CSV files:
- Imports into new and existing databases
- User can select to import first record as field name

Exports to .CSV files:
- User can select to export field names as first record

Text Searching:
- User selectable options
- First field search only
- Whole word - and case sensitive search

Database Sorting:
- By specified field
- Ascending or Descending order
- Sort in alphabetic, numeric or date order

More information: http://www.breadbox.com
Contact details: see page 68
1.1

Breadbox NView

Now you can read "and" edit a nicely formatted MS Word, WordPerfect, Lotus Write and other word processor document on the Nokia Communicator. Accept by e-mail any word processor document saved in the standard document format RTF (Rich Text Format). Download the RTF document from the web using the Nokia Communicator's WWW browser. Transfer the document to your Nokia Communicator from your desktop or notebook PC. Then you can read and edit, and email the document to others who can read it in their favorite word processor. Basic tables look pretty good too!

How about being able to read "and" edit a Palm Pilot document? Only Breadbox NView makes it possible. Just as with RTF documents, you can now view and edit common Palm Pilot PRC and PDB documents right on your Nokia Communicator. Breadbox NView makes it easy!

Download a Palm PRC or PDB document directly from the web using the WWW browser, or transfer the document directly from your PC, or receive it as an email attachment. Either way, you'll be able to view and edit the Palm document right on your Nokia Communicator!

What about Web Pages (HTM files)? NView handles web pages too. Download the text of any web page and view and edit it using NView.

More information: http://www.breadbox.com
Contact details: see page 68

Breadbox Word Matcher

It's a tool to help you... Solve Crossword Puzzles - Solve Word Games - Check Correct Spelling of a Word

NWord Matcher features:
- Very easy to use
- Includes over 12,300 words
- Quick scrolling through word list
- Highly compressed word list file to save space
- Easily add, delete, or modify words
- Handles International character sets
- Online Help at your fingertips

More information: http://www.breadbox.com
Contact details: see page 68
Calendar Search

Looking for anything in the Calendar? Our Calendar Search application can find user-defined string in Calendar entries and in To-do list. You can list some or all calendar events - displaying the date of event only or together with the time. Application is very easy to use and works on both Nokia 9110 and 9000i Communicator.

More information: http://www.agora.cz
Contact details: see page 68

Celesta Smart Forms

Communications-enabled databases
Celesta Smart Forms is a powerful Groupware solution for mobile professionals and work groups to store and browse information in easily customisable databases and to exchange data wirelessly using SMS and data calls.

Celesta Smart Forms provides better communications to your mobile users and increases productivity. Smart Forms has many happy customers in field and courier services, field sales, health service and many more.

Smart Forms allows you to connect external serial devices to the Nokia Communicator such as bar code readers or GPS receivers. You can also print or fax your forms. Exchanging file attachments such as images will soon also be possible.

Smart Forms Server/NT and Smart Forms for Windows
Smart Forms is also available as a NT Server version as well as a Windows 95/98 client. Smart Forms Server can interface your mobile users with legacy systems such as Lotus Notes and Remedy AR. You can also write your own interfaces by using ODBC or database links (Oracle, SQL Server and MS Access supported). Smart Forms Server communicates over SMS by using attached Nokia phone/card or direct connection to the operator's SMSC (optional). Data call communications requires Internet/intranet access point. You can use Smart Forms for Windows either on a laptop for mobile communications or in the office environment to share data in Smart Forms Server database.

More information: http://www.celestatools.com
Contact details: see page 68
1.1

Corporate Time

CS&T

Real-time scheduling for your Nokia Communicator.
CS&T's Corporate Time is the leading enterprise-wide calendar and scheduling solution on the market that allows you to schedule people, time, and resources across time zones all in real-time.
More information: http://www.cst.ca
Contact details: see page 69

Find

Find enables fast access to a specific information stored on Nokia 9110 Communicator browsing contents of different data using a "Global Search" function. Features:
• brows all documents files, calendar database and its memos, all contact databases, URLs, tones, images and folders
• scans for occurrences of given word including partial words in file names and / or file contents
• allows to scan data of any number of supported types
• scanning can be narrowed by time bounds
• found files or records can be opened via this application
• some general information about found data can be displayed
• enables to save search filter
• enables to save found items either in a format viewable by this application or as Note
Contact details: see page 71
Extended Extras provides application managing capabilities by allowing users to create own folders and managing applications in them. Applications can be installed and existing moved to Extended Extras easily.

More information: http://www.ah-creations.com
Contact details: see page 68

Flex Order Taking

This is the standard solution for the efficient entering of order details in mobile computing using a Nokia Communicator. Thanks to a number of ready-made masks and database structures, you can install the system and have it up and running within no time at all. Yet the masks and databases are still flexible enough to allow full customisation. As all your application-specific data is saved to the Nokia Communicator, you can have the full range of functions at your disposal even if no GSM communications network is available at the time. As soon as you have entered an order, you can send it immediately - without any time lag - to your head office via a GSM network, so that it can be processed straight away. Your head office can fax the confirmation of the order directly to your customer, so that you don’t need to carry a mobile printer with you. Increase the efficiency of your sales force - through error-free order entry, automatic order processing and state-of-the-art e-mail, SMS and Internet communication.

More information: http://www.yellow.de
Contact details: see page 73
1.1  

**HITS**

Stock Control Solution by Arctic Net AS

HITS offers you the power to make your system produce orders, reorders, offers and invoices in the field. The program will send, for instance, job orders to your Nokia Communicator via fax, and when the job is finished, you can respond by uploading a complete order file containing order numbers and all the item IDs used.

More information: http://www.arcticnet.no

Contact details: see page 68

**idealTime**

iDealTime Calendar information. Namedays, how fish takes bite, sports, hockey, national holidays, traditional celebration dates.

iDealTime enables you to get best use out of your calendar. Now you can get information about namedays, when the fish takes a bite, national holidays and traditional celebration dates in Finland and in other countries.

You can use your calendar information to plan your travel, meetings and so on.

New calendar info available at idealTime website every month for registered users: www.openinformation.fi/idealtime

iDealTime is easy to use. Just select and install the information you need. And your calendar is ready to use at once. No need to learn any new programs. Just use your Nokia Communicator as usual.

More information: http://www.openinformation.fi

Contact details: see page 71
Innolink Spreadsheet

The Innolink Spreadsheet is an add-on software application that runs in the Nokia 9110 Communicator. It is the world’s first spreadsheet that can communicate using GSM short messages. This way your sales reports, product and client lists, project costs and schedules can always stay up to date in your Nokia Communicator.

Features

• Easy-to-use spreadsheet editor
• Mathematics and logic functions
• Bar and line graph presentations
• Macro programming language
• User forms with input fields & selection lists
• GSM short messaging for sending and receiving data
• Printing
• Faxing
• Mail
• Web download
• PC file transfer
• File exchange in .csv format with Microsoft Excel

The easy-to-learn macro programming language allows anybody to create their own business applications and make them communicate with other Nokia Communicators or corporate database servers.

More information: http://www.innolink.fi
Contact details: see page 70
1.1 Jupiter Jumble

Jupiter Jumble engages the user in the solving of cryptograms, short puzzles with jumbled letters. The cryptograms are available in various languages for download from the web at www2.sysnet.net/~jupiterweb/index.html
More information: http://www2.sysnet.net/~jupiterweb/main.html
Contact details: see page 69

Logo Flash

Branding Application for Operators by PCS Innovations, Inc.
Logo Flash brands the Nokia Communicator with the operator's logo. Every time the user opens the cover of the Nokia Communicator, the operator's logo appears on the display for a period of two seconds. The logo can be loaded separately at any time.
More information: http://www.pcsinnovations.com
Contact details: see page 71
**File Transfer Protocol**

With FTP (File Transfer Protocol) you can transfer files between your Nokia Communicator and an FTP server located anywhere in the Internet or in intranets. Before using this application, be sure to define your Internet access point in the Internet settings.

When you open the FTP application, you will see two windows on the display: the window on the left shows the folders of the Nokia Communicator, and the one on the right shows the list of servers you have defined. Use the Tab, or the left and right arrow keys to move between these two windows.

More information: [http://www.forum.nokia.com](http://www.forum.nokia.com)

Contact details: see page 71

---

**Order/9000**

Order/9000 is Telepartner’s Sales Quotation and Order Entry System for the Nokia 9110 Communicator range, providing comprehensive sales quotation, order selection, stock-enquiry, despatch and confirmation facilities.

The system will be of benefit to any organisation involved in high volume or large range product sales. Its database is capable of handling up to 1000 customers, 10,000 products and 500 orders per device, and built-in intelligent search techniques make it highly suitable for organisations with many products or SKU’s.

Product details (sizes, rates, prices etc) can easily be stored, retrieved and combined to produce complex quotations or order lists including calculations such as discounts, VAT etc. Created orders can then be stored and/or immediately sent back to base for processing or verification.

For ease of integration with invoicing and other backend systems, the system comes complete with server-based data collection and management software.

More information: [http://www.telepartner.co.uk](http://www.telepartner.co.uk)

Contact details: see page 72
Personal AVUX

Office in your pocket
Personal AVUX is a tool for your own Nokia 9110 Communicator. With it you can organize your contact information in a tree structure and search through customer related task history, which includes e-mails, faxes, SMS messages, comments about phone calls, meetings and other tasks. It also helps you to schedule your future tasks in a calendar and in a project plan. For follow up you can insert notes, driving distances, used or ordered supplies and durations of the tasks.

More information: http://www.avux.com
Contact details: see page 68

Pro´Lingua Translator

Pro’ Lingua from Yellow Computing Computersysteme GmbH, Germany. Available in the following language combinations:
- Deutsch /Englisch and English / German
- Deutsch / Finnisch and Finnish / German
- English / Finnish and Finnish / English

Each Dictionary has over 100,000 words featuring:
- bilingual user interface
- software options
  - phonetic alphabet
  - list of irregular verbs
  - online reference for grammar
- software is available preinstalled on a 16 MB memory card or on CD-Rom for easy installation via PC Suite
- future language options: German / French / German, English / French, German / Italian / German

Contact details: see page 73
Task Assistant for Nokia 9000 Communicator and Nokia 9000i Communicators is an application for sharing tasks between Nokia Communicator users. You can send tasks e.g. from manager to employees using Short Message Service (SMS) and make enquiries about the task status.

More information: http://www.forum.nokia.com
Contact details: see page 71

TeamWARE SMS Directory

Contact information application by TeamWARE Group. TeamWARE SMS Directory enables you to find the right and updated contact information from a LDAP-compatible directory. Just type in the search criteria and let the TeamWARE system work for you. You can search for phone numbers, street addresses, e-mail addresses etc.

FEATURES:
• informs you via SMS messages of events related to:
  - Mailboxes, e.g. receipt of important e-mails
  - WWW sites, e.g. changes to certain sites
• forwards attachments (to fax)
• the agents works on your behalf 24 hours a day, 7 days a week.
• easy to set-up and use
• synchronizes calendars and appointments

More information: http://www.teamware.com
Contact details: see page 72
Wireless Calendar Dock

On-line calendar access gateway connecting Nokia Communicator with groupware such as TeamWARE calendar.

Keeps your schedules updated! You have your calendar all the time on-line with you and your team knows where you are. Wireless calendar dock keeps your Nokia Communicator calendar in instant sync with TeamWARE calendar all the time. Wireless calendar dock works with other vCal compatible calendar equipped phones such as Nokia 6110 and 6150. Get to-do list for tomorrow into your calendar from office without walking there! Supports also legacy phones.

More information: http://www.openinformation.fi

Contact details: see page 71

Xerox Mobile Documents

Xerox Mobile Documents is an innovative solution from Xerox Corporation that provides access to documents and document services anywhere, at any time, through your Nokia 9110 Communicator.

It is designed to support the mobile professional, providing convenient, dependable access to documents stored on a remote computer.

Xerox Mobile Documents is a streamlined, wireless solution that lets you:

• Fax documents to any fax machine
• E-mail documents to any e-mail address
• Instantly exchange documents with other users

More information: http://www.xerox.com

Contact details: see page 73
Breadbox NBanker

Portable Checkbook Solution by Breadbox Computer Company
Put your bank account on your Nokia Communicator. NBanker is compatible with Quicken or any financial program capable of importing/exporting Quicken files, for easy transfer of data to and from your PC. Also compatible with all other Breadbox, Brother, and New Deal Banker programs.
More information: http://www.breadbox.com
Contact details: see page 68

Euroconverter

The Euroconverter will be of help for the new currency in Europe.
Exchange rate: The value here is the exchange rate from Euro to the currency of the selected country.
In the amount field you can enter the amount to be changed. If you enter 100 and select DEM for 100 German Mark the program will calculate the rates for the Euro on top of the right side scale as well as the exchange rates for the other countries. The exchange rates are updated when you select another currency from the list or by any change of the amount value.
The exchange rates for the EU-countries are fixed and conform to the EU conversation (L 359 31.12.1998) and the other for the Non-EU-countries are configurable.
Shareware with registration key. Key is valid for Nokia-, Zoomer- and Desktopversion!
Contact details: see page 71
1.2

Online Banking

Online Banking (available only in Germany) is an application to manage your bank accounts using the Nokia 9110 Communicator. The account information is retrieved via the German T-Online service directly from the BTX/ZKA pages of your bank institute.

The application can handle up to 8 different bank accounts simultaneously. An Online-update option allows you the easy installation of new bank accounts at any time.

Contact details: see page 71

Mobile Bank

Mobile Bank

Homebanking Solution by Quadriga

With this application you have the chance to perform a limited number of banking operations, which typically you'll do on an ATM machine or in your own bank.

The operations allowed with Mobile Bank are as follows:
- Utilities Payment (phone, water, electricity and others);
- Account Balance;
- Movements;
- Cheque Re-Ordering.

This application uses the Short Message Service (SMS/PP) which is supported by GSM network, allowing direct communication between you and the bank. Note that the SMS message construction isn't directly your concern.

More information: http://www.quadriga.pt

Contact details: see page 71
Money Tracer

Banking Application by Quadriga
Money Tracer 1.0 enables you to track your expenses and income. You can check all transactions reported in your bank balance. All expenses and income can be classified according to preset or user defined categories: food, education, home, car, etc. Reports can then be generated from the register of transactions.
More information: http://www.quadriga.pt
Contact details: see page 71

QuadCulator

Calculator by Quadriga
QuadCulator consists of four calculators: standard, commercial, financial and statistical. The commercial calculator handles retail type calculations; the financial calculator calculates savings, loans, credit; and the statistical calculator handles various statistics.
More information: http://www.quadriga.pt
Contact details: see page 71
QuadLex provides powerful time billing capabilities for mobile service professionals such as attorneys, accountants, etc. with link capabilities to Timeslips and other time and billing software on PC.

More information: http://www.quadriga.pt
Contact details: see page 71

Mobile Banking

This Mobile Banking solution is developed exclusively for the Nokia 9110 Communicator. It is one of few mobile banking systems on the Nokia Communicator that implement point-to-point encryption for its SMS-based communication.

This multi-account, multi-currency system provides features like:
• On demand public information: product info, interest rates & exchange rates.
• On demand private information: Balance inquiry of individual account as well as consolidated account and review of last transactions.
• User Defined (push) Alerts: On Credit / Debit for each account. This feature enables the system to automatically alert (via SMS) the customer for every debit / credit transaction on the account defined.

Contact details: see page 70
Breadbox Pocket Vault

Now you can safely and confidently store away all of your personal and confidential information right on your Nokia Communicator. PocketVault provides password protection, special encryption, and plenty of room for all of your confidential information. All nicely tucked away in one convenient location on your Nokia Communicator.

More information: http://www.breadbox.com
Contact details: see page 68

IntelliMigrate

Move data easily from existing PDA to your Nokia 9110 Communicator. IntelliMigrate moves your calendar, contacts and to-do-list data from Sharp, HP, Casio, Windows CE handheld devices, eliminating the time-consuming, error-prone task of manually re-entering all your existing data. IntelliMigrate runs on a desktop PC. IntelliMigrate is also available for the Nokia 9000 Communicator and the Nokia 9000i Communicator.

More information: http://www.forum.nokia.com
Contact details: see page 71
**1.3**

**IntelliSync**

Data Synchronization System by Puma Technology, Inc.

With IntelliSync you can easily synchronize your PC data with your Nokia Communicator. IntelliSync enables you to synchronize calendar, contact, and to-do list information between your Nokia Communicator and multiple PC applications, including MS Outlook and Schedule +, Lotus Organizer, Day-Timer Organizer, and more.

More information: [http://www.forum.nokia.com](http://www.forum.nokia.com)

Contact details: see page 71

**My Flash**

Personalized and Customizable “Screen Saver” with password protection by PCS Innovations, Inc.

My Flash displays your personal bitmaps on the screen of the Nokia Communicator each time it opens or when it is awakened from the power saver mode. My Flash also has a password mode so that you can protect confidential data. Great for branding, identifying, and protecting your Nokia Communicator.

More information: [http://www.pcsinnovations.com](http://www.pcsinnovations.com)

Contact details: see page 71
2.1 Terminal Communications

AGUARD

Leave your laptop at home, just take the Nokia 9000 Communicator or Nokia 9110 Communicator with you and our AGUARD Paging and Monitoring software will not only give you a paging message of your system in trouble, but with the JCS-REMOTE-NOKIA option we also give you a full screen IBM AS/400 Emulated session to react immediately on the problem.
More information: http://www.jcint.com
Contact details: see page 70

BTERM

BTERM is a small VT320 (ANSI X3.64 and VT100 are subsets of VT320) terminal emulator. It can be used to upgrade the romcode of a router (it can do Xmodem), as a console for SPARCstation and to transfer files between two Nokia Communicators via IrDA.
More information: http://www.bbbs.net/nokia
Contact details: see page 69
2.1

Terminal 9000

One of the obvious functions missing from the Nokia 9000 Communicator and Nokia 9110 Communicator is one to allow you to use the serial port to communicate with other local devices. Terminal 9000 lets you do just this.

If you have engineers in the field who need to interrogate devices or program routers, phone systems etc. they can do it with Nokia 9000 Communicator and Nokia 9110 Communicator and Terminal 9000. Works with both cable and infrared ports! Text file transfer facility lets you exchange files with the remote device.

More information: http://www.autopage.ltd.uk
Contact details: see page 69
AvisoCom SMS-Chat

The new application (AvisoCom SMS-Chat) can be used to read and write sms-messages and provides an interface similar to chat applications, i.e. one can read all the messages sent and received to/from a particular person on one screen (scrollable). It is also possible to answer to this particular person with one single button press after having written the answer text into the screen. From a list which has an entry for each person a message has been received from, the user can choose a particular person to view the correspondences with it on one screen (and answer immediately).

2.2

Evolving SMS Server

SMS server by ÖÖ-Evolving Office Oy
Evolving SMS Server provides you with SMS-based office applications. Evolving SMS Server is an effective tool for creating SMS based office applications, ordering systems and value added services. It can be used to retrieve or update information in the Internet.

More information: http://www.oeeoe.fi
Contact details: see page 73

Inquisit

Personal Business Intelligence Service
• Information you can act on about the people, products, companies and topics that impact your bottom line
• Delivers right to your e-mail and on the days and times that work best for you
• Easy web and e-mail forms - no software to load or download

FEATURES:
• Your own staff of personal agents
• Worldwide sources
• Your own personal delivery schedule
• All you need is e-mail

More information: http://www.inquisit.com
Contact details: see page 70
2.2

Remote Update 9110

A remote update system from Yellow Computing Computersysteme GmbH, Germany. This software allows the remote distribution and administration of data and programs on a 9110 communicator. The update process is controlled and monitored by SMS messages. Any GSM-accessible FTP-Server can act as a data source.

Now you can easily update and administrate all your 9110 devices spread all over the world by sending a few SMS messages.

More information: http://www.yellow.de
Contact details: see page 73

SMS Chat

The SMS Chat application allows the creation of a peer to peer chat network between several Nokia Communicators. If you want to create a chat, you simply send "invitations" to other Nokia Communicator users. If they confirm, they enter the chat. The chat is held via SMS messages between the devices. There is no special chat server required. The application also allows to merge two separate chats, if required.

More information: http://www.yellow.de
Contact details: see page 73
TeamWARE SMS Agent

TeamWARE SMS Agent enables you to be more efficient and get smart notifications of e.g. important new incoming mail, or even to get documents attached to the e-mail messages to be faxed to your Nokia Communicator.

FEATURES:
• informs you via SMS messages of events related to:
  • Mailboxes, e.g. receipt of important e-mails
  • WWW sites, e.g. changes to certain sites
• forwards attachments (to fax)
• the agent works on your behalf 24 hours a day, 7 days a week.
• easy to set-up and use
• synchronizes calendars and appointments

More information: http://www.teamware.com
Contact details: see page 72

TeamWARE SMS Mail

Instant wireless e-mail by Fujitsu Corporation
ByeDesk SMS Mail enables you to communicate with any mail user in the Internet. You can send/receive e-mail messages up to 2280 characters long to/from any Internet mail address, picking e-mail addresses directly from the Contacts directory of your Nokia Communicator.

More information: http://www.teamware.com
Contact details: see page 72
Call-Log Manager

The Nokia Communicator has a detailed call logging facility which keeps a record of all incoming and outgoing communication between your Nokia Communicator and the world. However, there is no way to access this information apart from viewing it on your Nokia Communicator's screen. Call Log Manager allows you to export the current contents of the log to a .CSV format text file for exporting to a PC and analysing in a spreadsheet.

More information: http://www.dchapman.com
Contact details: see page 68

Solid Light Client

Embeddable data management system by Solid Information Technology Ltd.
Solid Light Client is a database client software library that allows remote access to the Solid server database from your Nokia Communicator. Solid Light Client provides a standards-compliant interface, with full SQL capabilities and a minimum footprint of only 33kB, thus making it ideal for mobile and embedded systems.

More information: http://www.solidtech.com
Contact details: see page 72
TBS TextPhone 9000

TextPhone Terminal by Technological Business Solutions Ltd.
TBS provides a mobile solution for hearing impaired people. Coming to the U.S. this Fall, the TextPhone application offers a traditional text phone to help hearing impaired persons communicate with other people.

More information: http://www.tbssystems.co.uk/handhelds
Contact details: see page 72

Telesta Mobile TextPhone

Telesta’s Mobile TextPhone Service is a text-grade service that is truly mobile, offering the same functionality as voice-grade services. The service includes unique features as international calls, call forwarding, and text-mail.

The text-grade service handles calls to or from a Mobile TextPhone in a transparent way. Subscribers can call anyone anywhere without having to worry about any specific settings pertinent to regional or national text phone standards. International calls are no longer a tedious problem. The user simply types a phone number and executes the call directly to that number.

More information: http://www.telesta.com
Contact details: see page 72
Advanced PPP Settings

This program gives access to a few PPP-related configuration options that would otherwise not be available to an end-user. It can be used for enabling two different features:

- Setting up PPP connections through an external modem attached to the Nokia Communicator's serial port, e.g. for connecting to a regular analog phone line.
- Debug logging for troubleshooting connection problems.

Contact details: see page 72

TeamWARE Intranet Security Server

Encrypted Virtual Private Network for Nokia 9000 Communicator

FEATURES:
• Provides authorised users of Nokia 9000 Communicator security client with secure encrypted tunnels to your corporate Intranet over GSM and public Internet
• Working at the IP network layer, the product is transparent to all TCP and UDP applications
• Is quick to install, easy-to-run and completely transparent after login
• Integrates with existing systems without the need to modify applications, servers or network configurations
• Consists of client software installed in Nokia 9000 Communicator and server software installed in a PC running between public network and a corporate Intranet
• Supports symmetric key lengths up to 256 bits. Authentication is based on public key technology
• Complements firewalls to further strengthen your overall corporate security policy

More information: http://www.teamware.com

Contact details: see page 72
VNC Client

The VNC Viewer lets you remotely access a machine running a version of the VNC Server (e.g. Windows 95/98/NT, X-Windows, Macintosh) from a Nokia Communicator. The connection can be made through the Internet or via RAS dial-in. Full screen graphics of the machine under control are available on the phone, and both mouse and keyboard commands can be executed across the network.

Contact details: see page 72
Welcome to GlobalMedic Wireless Self Care Solutions for the Nokia 9000 Communicator.
• Check Up: The GlobalMedic Check Up is the first online symptom-diagnosis application for the consumer.
• First Aid: The first aid section will provide a quick reference guide to treat common ailments.
• Pharmacist’s Advice: GlobalMedic offers a series of Pharmacist’s advice on what over-the-counter products to use for specific treatment.
• Interactive patient file.
More information: http://www.globalmedic.com
Contact details: see page 69

MedPEN Healthcare Assistant

Productivity Communication Tools for the Healthcare Industry
FEATURES:
• Provides the busy physician with access to medical reference texts "on the go"
• Insures continuity of care by providing access to medical history and treatment records during "off hours" from any location
• Enables medical patient referral electronically
• Enables electronic prescription writing
• Provides access to MedPEN’s data messaging center ("MedPEN Central") 24 hours a day
More information: http://www.medpen.com
Contact details: see page 70
PalmVUE and ECGstat

Wireless Telemedicine and Home Healthcare solutions

FEATURES:
* Review 12-lead and rhythm strip ECGs sent from the CCU or ER on the 9000 and simultaneously consult back to the units via the speaker phone capability.
* Search the MEDLINE and other Internet accessible databases from the bedside or your car while travelling between different care sites.

More information: http://www.datacrit.com
Contact details: see page 69
Best Practices

Mobile Health Care Solution by Orchid Systems, Inc.
Orchid Home health care practitioners and traveling medical specialists review and update procedural checklists. These checklists can be reviewed and updated online to eliminate the timing problems associated with paper records. Insurance payment codes can be completed at the same time as the consultation to eliminate errors and to accelerate payments.

More information: http://www.orchidsys.com
Contact details: see page 71

Cash Collections

Utility Cash Collections by Orchid Systems, Inc.
Helps utility companies bring overdue accounts current, rather than cut off service, in order to maintain the service revenues. This application provides the latest information about the account, including prior agreement history. It simplifies entry of the negotiated agreement with the immediate payment amount and the promised payment schedule to bring the account current.

More information: http://www.orchidsys.com
Contact details: see page 71
Infinite Interchange

Provides remote access to your network e-mail using the Nokia 9000 Communicator

FEATURES:
• An Internet/intranet-based e-mail server, based on today's open standards
• Provides local and remote access to network e-mail via IMAP4, POP3, Web/HTM L, and HDML
• Serves as an e-mail gateway, offering message transport from the network over the Internet to other sites
• Supports e-mail programs as diverse as BeyondMail, cc:Mail, DaVinci eMail, Eudora, ExpressIT! 2000, Microsoft Exchange, Microsoft Mail, and more
• Includes NNTP support for access to local and Internet newsgroups

More information: http://www.InfiniteMail.com
Contact details: see page 70

Inspection

Orchid

Dispatch inspectors to their next destination and provide them with complete information on prior violations. Information from any regulatory source may be retrieved and updated quickly. For example, tracing the inspection history of an elevator is provided online. Entry of the current inspection results eliminates errors and delays. Enforcement agencies see warrant information immediately to improve safety and efficiency.

More information: http://www.orchidsys.com
Contact details: see page 71
Materials Management

On-line order inquiry and updates help people use machines and materials most efficiently. As the supply chain shortens from the manufacturer to the consumer, this application simplifies issues and receipts among each order type. Sales and service orders may be reviewed and updated on-line. Tracking progress details can improve everything from customer satisfaction to waste management.

More information: http://www.orchidsys.com
Contact details: see page 71

Orchid Controller

Interaction Server
Connectivity and communications solution for simplifying the integration between the telephone company and the end user computer system. This is the way to simplify your Internet interaction using wireless devices. The URL and forms you specify will match the Nokia Communicator display. Even legacy applications may also be translated for easy use through the terminal mode or the browser mode. For example, providing an easy login to IBM mainframes using the Nokia Communicator. The desired key mapping and simpler application interactions are provided.

More information: http://www.orchidsys.com
Contact details: see page 71
Order Management

Orchid wireless applications help employees make timely decisions which improve field operations. Telephones, pagers and palmtop computers, as opposed to pencil and paper, may now be used at the point of action to verify current instructions or to update records for the rest of the enterprise. As a result, errors are eliminated and productivity improves.

Order Management helps field operators verify the latest order details and to complete transactions remotely. Changes, requested schedules and related accounting are each current when viewed by the rest of the employees in the organization. Order types managed include Sales Orders, Purchase Orders, Work Orders, Maintenance Orders and Inspection Orders.

More information: http://www.orchidsys.com
Contact details: see page 71

Utility Management

Orchid wireless applications help employees make timely decisions which improve field operations. Telephones, pagers and palmtop computers, as opposed to pencil and paper, may now be used at the point of action to verify current instructions or to update records for the rest of the enterprise. As a result, errors are eliminated and productivity improves.

Transactions Utility Management helps field operators verify the latest order details and to complete transactions remotely so that changes, requested schedules and related accounting are each current when viewed by the rest of the employees in the organization. Transaction types managed include: Collections, Service Orders, Work Orders, Maintenance Orders and Inspection Orders.

More information: http://www.orchidsys.com
Contact details: see page 71
WebShaper

WebShaper allows employees to interact with their existing software applications through wireless pagers, telephones, and palmtop computers. As opposed to rewriting source code for legacy applications, the screens are simply translated in real time for practical use through portable device displays. Pilot projects may also be quickly deployed.

Large organizations run terminal applications on systems such as IBM mainframes and fault tolerant Tandem systems that contain information allowing employees in the field to be most productive. Allowing terminal applications to be interactive through the special display and buttons of wireless devices is achieved by WebShaper.

Contact details: see page 68
Despatcher/9000

Despatcher/9000 TM is a fully functional Field Service Despatch Application specifically featuring the Nokia Communicator as a tool for teams of Service Technicians operating in the field.

Comprising a configurable user application on Nokia’s Communicator together with sophisticated Server-based Database administration and Management functions, Despatcher/9000 integrates with customer Service Delivery Systems to provide superior levels of customer service and control.

Support Personnel in the Despatch Centre receive complete and up-to-date information regarding the engineers and their Service Activity.

Despatcher/9000 is a scaleable application, designed to support smaller and larger Field Forces alike.

More information: http://www.telepartner.co.uk
Contact details: see page 72

Digital Camera Connectivity

Digital Camera Connectivity for the Nokia 9000i Communicator
Digital camera connectivity is an application which enables image transfer from a digital camera to the communicator.

Digital Camera Requirement: The digital camera must support the “IrTran-P” infrared protocol. For instance JVC, Casio, Sharp and Sony have camera models including this character.

More information: http://www.forum.nokia.com
Contact details: see page 71
FieldForce Connector

The Connector is a companion product to the FieldForce job management system produced by FastForward Data Systems Ltd. It uses SMS messaging to enable job information to be sent to and from a central unit and remote users on the Nokia 9110 Communicator.

It has access to databases of jobs and parts and within these parameters it accepts fields for part assignment and updates of job status (with a variety of options covering the entire cycle). In partnership with the primary product (FieldForce) it enables proactive job despatch and management using remote operators.

FrotCom 9000

Fleet management system by Quadriga
FrotCom 9000 is a special version of Quadriga's fleet management system, FrotCom, that permits positioning of the vehicles on a fleet and messaging between the dispatch centre and the vehicles.

More information: http://www.quadriga.pt
Contact details: see page 71
Graphic Point

Graphic Point extends Nokia 9110 Communicator for the latest short messaging (SMS) features that are not supported by default. Following special message formats will be available to the Nokia 9110 Communicator with Graphic Point:

• Operator Logo
• Group Graphic (Caller Icon, Caller Graphic)
• Picture Message
• Flash SMS (class 0 SMS)

Graphic Point has built in graphic editor for designing own logos and support for several graphic file formats for importing and exporting such as .jpg, .gif, .bmp, .ngg, .nol, .wbmp, .nlm.

Graphic Point adds also support for receiving Group Graphics and Picture Messages directly to your Nokia 9110 Communicator. You can exchange logos with other GP users as well as use the Picture Messaging with the other phones with same capability.

More information: http://www.ah-creations.com
Contact details: see page 68

GPS-SMS

GPS-SMS is a GPS receiver connectivity application, which enables position information transfer from a GPS receiver to the Nokia Communicator. This GPS-SMS application shows on the Nokia Communicator screen position information (co-ordinates in longitude and latitude, time, velocity and direction, the number of satellites available, and whether you are using differential correction or not) received from the GPS receiver. You can send this position information further by SMS to another GSM phone or via cardphone to a PC. If you want to see the location in a map from your PC screen you will additionally need a Map Database Software. This GPS-SMS application supports GGA- and VTG-frames of NMEA (National Marine Electronics Association) 0183 protocol over serial cable link between a GPS receiver and the Nokia Communicator. You can download this application free.

More information: http://www.forum.nokia.com
Contact details: see page 71
Infrared Object Exchange

Infrared Object Exchange Application for the Nokia 9110 Communicator

The Infrared object exchange is an application for the Nokia 9110 Communicator which enables file transfer over infrared between the Nokia Communicator and:

- another Nokia Communicator (9110 or 9000i) having this software
- Hewlett Packard’s CapShare 910 scanner
- any other device that supports IrObex (infrared object exchange protocol)

Object Exchange allows you to capture documents from the Hewlett Packard Capshare 910 device to your Nokia Communicator via an infrared IrObex connection, and forward them as a fax or e-mail attachment.

More information: http://www.forum.nokia.com
Contact details: see page 71

mTrack - Mobile Tracking and Communication System

mTrack- Mobile Tracking and Communication System is based on wireless communication applications. The system enables real-time and precise tracking from PC/web workstation at dispatch headquarters. mTrack combines automatic vehicle location (AVL), maps, job despatching, remote monitoring, and alarming with two-way messaging. The system is fully scalable.

With mTrack the status and exact location of each object or group of object can be seen and information can be sent to the object and objects can communicate back. A message can be distributed simultaneously to multiple objects based on pre-determined list or selecting from the map.

mTrack’s positioning is based either on Global Positioning System (GPS) or on cellular network positioning where available. The location information is transmitted via wireless network either automatically or when user of mTrack’s mobile device user does so or on request (if granted) made by mTrack server.

mTrack’s main features for Communicator are position based messaging, information/task/job/status/etc. messaging between office and mobile person, showing position for the user, alarm messaging and remote configuration.

More information: http://www.meridian.fi
Contact details: see page 71
Quick Imaging

Now you can communicate easily with an IR-TranP equipped digital camera using Nokia 9110 Communicator. Quick Imaging application automates image transfer between Nokia 9110 Communicator and digital cameras. Quick Imaging provides three new features:

• Enhanced image download into Communicator an automatic conversion to jpeg format
• Optional storing of images in the memory card
• Automatic integration to e-mail application - downloaded file is automatically attached to a new e-mail message.

You can send downloaded images to your friends or colleagues from the Communicator by e-mail or fax. You can also send them to a dedicated WWW site for storage and sharing. You can also easily attach them to a contact card. The possibilities for wireless imaging are endless!

More information: http://www.forum.nokia.com
Contact details: see page 71

SMS Remote Control

SMS Remote Control is a RS-232 Serial Port connectivity application. With this application you can use standard GSM cellular phones (Nokia, Ericsson, Siemens, Motorola etc.) to send SMS messages (commands) to the Nokia Communicator.

This application receives SMS messages (commands) and send those message commands via serial cable (DLR-1, DLR-2) through RS-232 port to the Hardware device. SMS Remote Control Application is running all the time in background. After Nokia Communicator gets right kind of SMS ( //BLIT11 ... ) the application will automatically send this command further if the cable is connected and the Hardware device is OK. As SMS Remote Control Application is extremely open and easy to use, it may be used in several application areas: locking, heating, lighting, elevators, electrical and energy networks, water supply, industrial controls and alarm handling, various automates, electric commerce, sales support, information systems, vehicle and cargo tracking etc. Next step could be 2-way dialogues and controls with Nokia Communicator and hardware device. You can download this application for free.

Contact details: see page 71
TBS TrackMaster

TBS TrackMaster provides a cost effective GSM solution for vehicle location and telemetry. The TBS TrackMaster uses ISDN fast connection technology to deliver positions from a mobile unit. It allows the location and progress of vehicles to be followed on a map display.

More information: http://www.tbssystems.co.uk/handhelds
Contact details: see page 72

Tone 9k

Tone 9k allows ringtone conversion between several different formats and Communicator ringing tone format. User can compose with textual note display that is derived straight from conventional Nokia gsm phones, like 3210. Conversion is possible from e.g. MID (PC-Composer), RTTTL (Ringing Tone Text Transfer Language) and from several other GSM phone notes.

Tone 9k is the extension to be used with Communicator own Composer. Together they extend ringing tone support beyond any other.

More information: http://www.ah-creations.com
Contact details: see page 68
Yes, now you can fully automate your job dispatch and field reporting operation thanks to the comprehensive and versatile solutions provided by End2End. What’s more, End2End lets you know where all field-based staff are all of the time and what they are doing. This is achieved by combining the visual display techniques of automatic vehicle location with job dispatch and reporting systems. These procedures can even be integrated with most existing call centre/call logging software to provide a seamless package and release valuable staff for other duties.

Automatic Vehicle Location from End2End is based on proven mapping software where the customer decides the level of maps required. This utilises the freely available global position system (GPS) for accurate satellite location information. This position is forwarded to the control centre in seconds via the GSM short message service. User configurable update timing lets you determine running costs.

Vehicle status and grouping allows you to display only the relevant vehicles at any one time. There’s no point showing delivery vans when you are looking for a service engineer! Or service engineers who are on an all day job when you want one now.

With an End2End solution tailored to your needs, efficiency can be measured in cost savings, increased productivity and customer satisfaction - not to mention fewer headaches in the control centre.

More information: http://www.endtoend.co.uk  
Contact details: see page 69

Universal GPS Client

A GPS client software from Yellow Computing Computersysteme GmbH, Germany. The Universal GPS Client is a connectivity application which supports the automatic position tracking of a 9110 device connected to GPS receiver. The GPS data is send periodically by SMS or can be monitored using request SMS-messages. The SMS message format is compatible with Internet based systems like WEBFLEET or PC based systems like MapGuide etc. On the 9110 Screen all important GPS data is displayed and a notification system is also included in the GPS application. An Emergency-button allows to act fast in critical situations. All system settings like tracking cycle, geographical area, speed detection etc. are remote configurable.

Contact details: see page 73
Bindevice

Bindevice has 85 fields! It allows you to go to whatever field you like to solve. Bindevice also saves the high-score.

9 Lives

Alley cats are always looking for food. Your cat must catch all the food it can get in order to get energy. In each level of the game, the cat will find a new alley where food is available. There are also dogs and other perils that make it hard on the poor cats. The cats in this game will attempt to go from alley to alley, eating all the food and avoiding the perils. A cat dies if its 9 lives are spent.
More information: http://www.forum.nokia.com
Contact details: see page 71
Logic

Logic for Nokia 9110 Communicator is a game of logic and a test of intelligence. The objective of Logic for Nokia 9110 Communicator is to break a hidden code of figures. Each game features a different, randomly generated code of figures, hidden from the player, who has ten opportunities to try to duplicate the code without seeing it.

So is Logic for Nokia 9110 Communicator a game of pure guesswork? Definitely not: following each of the player's guesses, the game scores the attempt by giving the player certain 'clues' relating to their guess. By using strategy and logic to interpret the clues, and by relating them to previous guesses, it is almost always possible to crack the code in the ten attempts permitted.

Logic for Nokia 9110 Communicator has five difficulty levels to choose from and the sound effects utilise fully the capabilities of Nokia 9110 Communicator. Bonus timer keeps you trying hard and the high score list allows you to compete with your friends in this mind-teasing game.

Logic for Nokia 9110 Communicator is freeware.

Contact details: see page 71

Puzzle

Sam Loyd's (1841-1911) famous 15 puzzle invented in 1878 was once banned from the workplaces. Your mission is to organize the pieces of the puzzle into the right order by moving one piece at a time.

More information: http://www.forum.nokia.com

Contact details: see page 71
QuadChess

QuadChess is a chess game for your Nokia Communicator. QuadChess can be played in four different ways: Player vs. Communicator, Player 1 vs. Player 2 (via SMS or with the same communicator), and Communicator vs. Communicator.
More information: http://www.quadriga.pt
Contact details: see page 71

Reversi

Reversi was invented in 19th century England and has become a classic among modern logic games. The rules are simple and the game is fast, but it’s hard to master. Your job is to conquer more ground than your opponent. Capture opponent’s chips between yours and win them over.
More information: http://www.forum.nokia.com
Contact details: see page 71

Same

The objective of the game is to remove all the tiles by clicking them with the mouse. A tile can only be removed if at least two tiles of the same color are next to each other (above, below, left, or right, but not diagonally). Holes created by disappearing tiles are filled by other tiles moving down and (if possible) left.

Contact details: see page 70
ACTiSYS IR Computer Adapter

Multi-mode infrared computer adapter
The ACT-IR220L computer adapter attaches to the RS232 serial port of a desktop PC to give you wireless data transfer for record synchronisation, file backup and network access, directly from your Nokia 9110 Communicator.

The computer adapter is IrDA-1.0 compatible and it can reach communication distances of 0 cm to 200 cm with no external power. If using the adapter with the Nokia Communicator Fax application, position the Nokia Communicator away from the adapter to prevent electrical interference. Once the adapter has been attached to a compatible PC, you only need to check that the infrared port of your Nokia Communicator faces the infrared eye of the adapter, and start the Infrared activation application on your Nokia Communicator for PC connectivity.

More information: http://www.widget.co.uk
Contact details: see page 67

ACTiSYS IR Printer Adapter

Infrared printer adapter
With the ACT-IR100M printer adapter you can print from your Nokia Communicator wirelessly via the infrared connection. The adapter works well with any parallel printer. The adapter has a built-in printer pass-through connector and very compact IrDA protocol. The adapter is powered by an AC adapter. To print via the infrared connection, connect the AC adapter to the parallel printer and plug the infrared printer adapter in it.

Check that the connection type of the Nokia Communicator is set to Infrared in the Print settings found under System settings, and that the baud rate is set to the value recommended by the adapter manufacturer. Then use the print option in the Nokia Communicator.

**Canon BJC-50 Printer**

The Canon BJC-50 is just half the size of a notebook computer (or half an A4 page) and weighs 900g - small and light enough for the most executive briefcase.

When you're on the move you don't want to be carrying and connecting computer cables. That's why the BJC-50 has a built-in IrDA port for automatic infra red communication with your PC. IrDA eliminates the need for any connection cables - no having to remember which cable goes where. You're just seconds away from a perfect print. Just put your BJC-50 next to your laptop or PC and the data is beamed directly to the printer.

The BJC-50 isn't just a printer. With the optional IS-12 Colour Image Scanner Cartridge installed, the BJC-50 becomes a complete portable office. The IS-12 scanner cartridge plugs into the BJC-50 in seconds to transform the printer into a 360dpi, 24-bit colour sheet-feed scanner.

Contact details: see page 68

**Citizen PN 60i Printer**

The Citizen PN 60i portable printer is the world’s smallest A4 plain paper laserquality printer. Small and light - it weighs just 500 g (700 g with its Ni-Cad battery) - with excellent functionality, the PN 60i is ideal for the mobile user. Connectivity and compatibility are not a problem with the PN60i’s integral infrared (IrDA) interface.

For the mobile professional, who is travelling abroad, working from hotel rooms, planes, trains or cars, Citizen offers the ultimate cable-free printing solution.

Contact details: see page 69
**ESI-9580 JetEye Printer Adapter**

Wireless infrared printer adapter
The JetEye printer adapter ESI-9580 provides "walk-up-and-print" convenience with no cable connections to make. The adapter connects to a standard parallel Centronics printer port.

More information: [http://www.extendedsystems.com](http://www.extendedsystems.com)
Contact details: see page 69

**ESI-9680 JetEye PC Adapter**

Wireless infrared PC serial adapter for a desktop PC
The JetEye PC adapter ESI-9680 allows communicator users to make wireless connections to their work environment through convenient infrared technology.

The adapter connects to a standard 9-pin PC serial (RS-232) port. It enables communicator users to use the PC Suite program for transferring data between the communicator and a desktop PC without connecting cables.

Contact details: see page 69
GA 935-N Printing Adapter

Adapter for parallel printing GA935-N
This portable adapter provides the Nokia Communicator with printing capabilities for parallel printers equipped with a Centronics connector. Designed for use with the Nokia 9110 Communicator, this product allows users to print with compatible printers anywhere. Connect the cable supplied with the Nokia Communicator to the 9-pin connector of the printing adapter, and the other end to the Centronics connector of a parallel printer. Disconnect all cables when not in use to maximise battery life.

Check that the connection type of the Nokia Communicator is set to Cable in the Print settings found under System settings, and that the baud rate is set to the value recommended by the adapter manufacturer. Then use the print option in the Nokia Communicator to print documents, faxes and other information.

HP CapShare 910 Scanner

The HP CapShare information appliance is a brand new handheld e-copier which enables Mobile Professionals to communicate all paper-based information fast and effectively. HP's CapShare device is small, lightweight and powerful, turning your paper data instantly into black/white and greyscale electronic format whether a small business card or a large A1-size flipchart. You can capture, store and then send from just about anywhere - and everything from hand-written scribbles to newspaper articles. If you do a lot of travelling and visiting clients, but also need to be in constant contact with your business base, the HP CapShare is right for you. The number of business professionals who work away from their desks is growing rapidly and HP JetSend Communications Technology is an HP-designed communications protocol, allowing users to focus on the task, not the tool. With HP JetSend, users can exchange information from one device to another over an IP intranet network connection or an infrared connection. A user can create or scan a document and print it directly to a remote colleague's printer down the hall, across the building, or around the world.

Contact details: see page 70
HP DeskJet 340 CBi Printer

Imagine you surf the web or work on your e-mail with your new Nokia Communicator - and cannot print the information you want. As a printer, the HP DeskJet 340CBI completes your mobile and wireless office. It gives you all the flexibility you need while on the road, and offers exceptional robustness and ease of use:

• The body is metal enforced so it can swallow hits and strokes without damage.
• It comes standard with a rechargeable battery and an infrared adaptor to enable you to use it without cables.
• The print cartridges last longer than most other printers' cartridges; and if you need to replace one, HP supplies are widely available.

Contact details: see page 70

Mobile Information Collector

C-Pen
C Pen is a PDA that enables you to write, scan and display text. Scanned information, such as documents and business cards, is easily transferred to your Nokia Communicator or PC via the IR-port.

Additional features:
• C-Fax/C SMS - send faxes or SMS using the Irmodem that is built-in in the Nokia.
• C Dictionary - A software package for C Pen that translates word you read.

At the moment you can not beam a Vcard or a document directly to your communicator, but this feature will be available within some months. What you can do is to send a text as an SMS or fax to your own phone and in this way transfer a document to the communicator.

More information: http://www.cpen.com
Contact details: see page 69
Symbol LS 4006i

Symbol LS 4006i Hand-Held Bar Code Scanner (Keyboard Wedge and Synapse)
The LS4006i scanner is a Keyboard "Wedge" interface, which adds efficient, reliable bar code reading to your PS/2 or AT/XT terminal. The LS4006i Keyboard Wedge scanner fits electrically between your keyboard and host PC, and input from your LS4006i will seem like keystrokes to the terminal. Since entered scan data is transmitted as keystrokes, no software changes to the host system are necessary.

The scanner contains on-board discrete keyboard wedge communications for connecting to asynchronous terminals and host systems. It can also accommodate any of the Synapse "Smart Cables" which allows you to connect to a wide variety of host systems. Most installations require only one cable; others require additional adapters and a power supply. The LS4006i features are as follows:

• A brighter 650 nm laser diode for increased scan line visibility in all conditions
• An increased scan rate (~100 scans/second) for more aggressive scanning performance
• "Entry level" PDF reading capability (manual raster) in addition to excellent 1-D scanning capability
