

INSIDE the Altair® Computer

1. Central Processing Unit (CPU) Board.

This double-sided board is the heart of the Altair 8800. It was designed around a powerful, byte oriented, variable word length processor—a complete central processing unit on a single LSI chip using n-channel, silicon gate MOS technology. The CPU board also contains the Altair System Clock—a standard TTL oscillator with a 2.000 MHz crystal as the feedback element.

2. Power Supply. The Altair Power Supply provides two +8, a +16 and a -16 volts. These voltages are unregulated until they reach the individual boards (CPU, Front Panel, Memory, I/O, etc.). Each board has all the necessary regulation for its own operation.

The Altair Power Supply allows you to expand your computer by adding up to 16 boards inside the main case. Provisions for the addition of a cooling fan are part of the Altair design.

3. Expandability and custom designing. The Altair has been designed to be easily expanded and easily adapted to thousands of applications. The basic Altair comes with one expander board capable of holding four vertical boards. Three additional expander boards can be added inside the main case.

4. Altair Options. Memory boards now available include a 1024 word memory board, a 2048 word memory board, and a 4096 word memory board. Interface boards include a parallel board and 3 serial boards (RS232, TTL and Teletype). Note: Interface boards allow you to connect the Altair Computer to computer terminals, teletypewriters, line printers, plotters and other devices.

Other Altair Options include additional expander boards, computer terminals, audio-cassette interface board, line printers, ASCII keyboards, floppy disc system, alpha-numeric display and more.

5. All aluminum case and dress panel. The Altair Computer has been designed both for the hobbyist and for industrial use. It comes in an all aluminum case complete with sub-panel and dress panel.

6. It all adds up to one fantastic computer. The Altair is comparable to mini-computers costing 10-20 thousand dollars. It can be connected to 256 input/output devices and can directly address up to 65,000 words of memory. It has over 200 machine instructions and a cycle time of 2 microseconds.

You can order the Altair Computer by simply filling out the coupon in this ad or by calling us at 505/265-7553. Or you can ask for free technical consultation or for one of our free Altair System Catalogues.

PRICES:

Altair Computer kit with complete assembly instructions	\$439.00
Assembled and tested Altair Computer	\$621.00
1,024 word memory board	\$97.00 kit and \$139.00 assembled
2,048 word memory board	\$145.00 kit and \$195.00 assembled
4,096 word memory board	\$264.00 kit and \$338.00 assembled
Full Parallel Interface board	\$92.00 kit and \$114.00 assembled
Serial Interface board (RS232)	\$119.00 kit and \$138.00 assembled
Serial Interface board (TTL or teletype)	\$124.00 kit and \$146.00 assembled
Audio Cassette Record Interface	\$128.00 kit and \$174.00 assembled
Expander Board (adds 4 slots to 8800)	\$16.00 kit and \$31.00 assembled

NOTE: Altair Computers come with complete documentation and operating instructions. Altair customers receive software and general computer information through free membership to the Altair User's Club. Software now available includes a resident assembler, system monitor, text editor and BASIC language.
