CP/M
LOW-COST MICROCOMPUTER SOFTWARE

CP/M is a low-cost control program for microcomputers which brings together recent advances in computer and peripheral technology. CP/M is an advanced disk operating system designed for use with IBM-compatible diskette-based computer systems which employ the Intel 8080 microcomputer. Previously available only to OEM's, CP/M has been in existence for over three years in various manufacturers' products, and has undergone extensive field testing. The functions of this software package include named dynamic files, program editing, assembly, debugging, batch processing, and instantaneous program loading, resulting in facilities similar to popular timesharing services. CP/M is an "unbundled" software package which can be easily adapted to any 8080 or Z-80 computer system with at least 16K of main memory and one or two IBM-compatible disk drives. The field-modification manual provided with CP/M has been used successfully by many CP/M users in customizing CP/M for their own hardware configurations.

❚❚ DIGITAL RESEARCH

Please send me the following:

- ☐ **CP/M Documentation** (Complete set of 6 manuals) for **$25.00.**
- ☐ **CP/M Documentation** and **CP/M System Diskette** for **$70.00.**
- ☐ Free **CP/M brochure** and **price list.**
- ☐ **Information** concerning high level languages and optional packages.

NOTE: IMS Associates and Digital Systems distribute CP/M with their hardware systems.
