The Minifloppy tradition. The standard is set for high-performance 96 TPI Minifloppys. And it's by Shugart. Double track and double density, the single and double-sided SA410 and SA460 Minifloppys deliver .5 or 1 MBytes of unformatted capacity on a 5¼-inch diskette. Small wonder. Designed by the company that invented the Minifloppy, the SA410 and SA460 represent the culmination of all previous 5¼-inch disk drive technologies. What you get today is the most thoroughly engineered, most manufacturable, and most reliable Minifloppy drive available. The SA410/460 are the new standard in the eighties for price, performance, and capacity.

Step into the future. Innovation, experience, and proven performance have always been the hallmark of the Minifloppy tradition. And the SA410/460 are the first of the next generation in that tradition. Utilizing technology proven in our 8-inch disk drive products, the SA410 and SA460 use a multi-step positioning technique, thus eliminating pole asymmetry, an inherent source of positioning errors and degraded performance. The simplicity of this multi-step positioning motor and the HeliCam lead screw follower insure its manufacturability, consistent high performance, reliability, and low cost.
Positioned for success. Shugart's new HeliCam™ positioner delivers far greater accuracy than that of competitive actuators. The result is super precise positioning tolerances that virtually eliminate the problems of media interchange previously associated with 96 TPI 5¼-inch technology. The HeliCam solution means that you can reduce, by a significant margin, data handling errors — especially between systems in less than ideal environments.
