Which personal computer can make you better at what you do best?

The first step in your decision-making process is analysis. You look at all the numbers, and all the facts, before you leap. So you don’t want a computer that’s going to run short on memory. Not when you can have the HP-87 and a memory that expands to over half a million bytes.

We call it HP-Easy. Turn on the HP-87, and it’s ready to go. The ROM-based operating system puts our built-in, enhanced BASIC to work for you. Instantly. The HP-87 has built-in commands and editing keys that eliminate complicated keystroke sequences. Whether you’re generating a complex graph, writing a program or correcting errors.

And interfacing peripherals is as easy as putting a plug into a socket. That’s the kind of craftsmanship that’s putting all our Series 80 computers on the map. We’re building power, friendliness and reliability into every one of them. From our portable partner, the HP-85, to the high-powered HP-87.

The most intelligent thing to do now? Get your hands on an HP-87. And then on the competition. You won’t have any trouble making the right decision. Not if you want to get better and better at what you do best.

For the HP dealer nearest you, call TOLL FREE 800/547-3400 or in Oregon, Alaska and Hawaii call 503/758-1010. For additional product information, write Hewlett-Packard, Dept. 276L, Corvallis, OR 97330.

Introducing the new HP-87.
It’s very good at what you do.
