Proven tools for programmers. From Microsoft.

Old friends. Eight years ago, Microsoft put BASIC on the first microcomputer. Today, there are more than 1,000,000 copies of Microsoft® languages in use. BASIC interpreter. BASIC compiler. FORTRAN, and COBOL. A proven set of programming tools. All, fully supported by Microsoft.

The best get better. Good tools work better if you keep them sharp. That's why we constantly improve the tools we offer. Enhancing them. Increasing their utility. Taking full advantage of the strengths of each language. Supporting you, the user, with a full range of finely honed programming tools.

Technical support. When you buy our tools, you get our number. If you have technical problems, call the Microsoft support staff for assistance. If we don't have the answers now, we'll find them and call you back.

Compatible documentation. All Microsoft languages share a common approach to documentation. Starting with plain English. That means that even when you're learning a new language, you won't have to learn a new vocabulary.

Linkable code. All Microsoft compilers share common utilities. A linker accompanies each compiler. That means you can write programs in two or more languages, taking advantage of the specific strengths of each, then, link and run them as a single program.

Leadership in micros. Nobody gave us leadership. We earned it through innovation, enhanced programming tools and complete user support. Today, Microsoft is the only software supplier to offer you a complete programming environment. Including specialized languages that support you in a wide variety of programming situations. Tomorrow, you can look to Microsoft to make that environment even more productive.

Better tools. Ask your Microsoft dealer about Microsoft's family of proven tools for programmers: BASIC interpreter, BASIC compiler, FORTRAN and COBOL. Each is a specialized tool for a special programming problem. Better tools. And better tools make better programs.
