The dawn of a new era in microcomputer technology

NEW TANDY TRS-80® MODEL 2000

High Performance MS-DOS Computer That Operates at Twice the Speed of the IBM PC

Our Tandy® 2000 delivers much more than other 16-bit MS-DOS based computers. More speed. More disk storage. More expansion. Higher resolution graphics. And a modular design that advances the science of ergonomics.

Use the Hottest Names In Software

Like dBase II, a powerful relational data base management program. Microsoft-Multiplan, the "second-generation" electronic worksheet. PFS:File, a simple way to organize information. MultiMate, the highly-acclaimed word processing program. And many more already acclaimed by the entire microcomputer industry. Still more programs are coming, including Microsoft's state-of-the-art MS-Windows operating environment. You can view several "windows" at once—files, letters, graphs and more—and exchange information between them.

More Speed, Storage and Expansion

A "next-generation" 16-bit CPU makes the Tandy 2000 dramatically faster than the IBM PC and other MS-DOS systems. The vast storage capacity lets you set up massive data bases. You can add more memory, high-resolution color and monochrome graphics, our new Digi™-Mouse and much more. And you can install most of these options yourself.
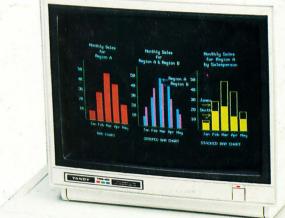

Complete Service and Support

The Tandy 2000 is backed with the quality and support that have kept Tandy Corporation in the forefront of the microcomputer industry. See the Tandy 2000 today at over 1000 Radio Shack Computer Centers and participating Radio Shack stores and dealers nationwide.
