

After you've broken the pole vault record, see if you can outsmart the killer dwarves.

Two incredible games from Microsoft.

There are plenty of computer games around. But most of them probably won't hold your interest for more than a few hours.

That's what makes these two releases from Microsoft so remarkable. They'll keep challenging you in new ways every time you play.

Olympic Decathlon—a real workout!

There's never been a program that tests your reflexes and coordination like Olympic Decathlon. Just like the real one, Microsoft's has 10 events, including shot put, pole vault, long jump, javelin throw, and six more. Winning takes a combination of strategy, timing, coordination, and physical endurance (really!).

When you jump or throw, the program calculates the actual trajectory, and shows you what's happening with exciting animated graphics. After each event, the scores of all competitors (up to 8) are displayed. It's the ultimate party game to show off your computer!

Disk-based Decathlon runs on a 32k TRS-80. The cassette version requires a 16k Level I or Level II system.

TRS-80 is a trademark of Radio Shack Corp.
Apple II is a trademark of Apple Computer, Inc.

Versions for the Apple II available soon.

Adventure—the classic mind game.

If you've ever been lucky enough to play Adventure on a big computer, you know how addictive it is. Fantasy, deduction, and magic all come into play as you explore the chambers of Colossal Cave, collecting treasure while avoiding pitfalls and hostile creatures. There are surprises around every corner, and

even veteran players keep discovering new things and improving their scores.

Microsoft has the complete microcomputer version of the original FORTRAN Adventure that runs on large timesharing systems. It runs on TRS-80 and Apple II systems with at least 32k memory and one disk.

Microsoft—a name worth trusting.

As the world's most experienced producer of microcomputer software, Microsoft's policy is to offer only the best, most rewarding programs in existence.

After playing Adventure and Olympic Decathlon, we think you'll agree.

Visit your computer retailer soon for a real challenge. Or ten.
