

WANTED

SOMETHING TO RELIEVE THIS MESS!

**If you've ever found yourself searching for a calculator or a notepad
when you've got a computer right in front of you,
then you know the absurd situation we're illustrating.**

*Sure, there are clumsy little programs
you can boot up to accomplish these
tasks . . . but it always means first stepping
out of the software you're working with.*

*What's always been needed is a tiny
piece of software, occupying only a few K,
that would be tucked away in an unused part of
RAM no matter what program you're running.
Whether you were running dBaseII, Lotus 1-2-3,*

*WordStar or whatever . . . it would always
be ready for lightning-fast use. You could just
hit a button and a window would open that
would offer you a notepad, business or scientific
calculator, an ASCII table, a Metric converter
and even an appointment calendar. Hit the
button again and your work would be saved
to disk and you'd be right back in your
original software!*

DELIVERED

Something totally new in applications software from Borland, the folks who make Turbo Pascal®

ALWAYS PRESENT IN RAM, NO MATTER WHAT SOFTWARE YOU'RE RUNNING!

- A CALCULATOR
- A NOTEPAD
- AN ASCII TABLE
- METRIC CONVERSION
- APPOINTMENT CALENDAR

HIT THE BUTTON, AND THE SIDEKICK® WINDOW OPENS...

HIT IT AGAIN, AND YOU'RE RIGHT WHERE YOU LEFT OFF IN YOUR ORIGINAL PROGRAM!
(You never really left!)

SIDEKICK®
INTRODUCTORY OFFER

\$49.95

Available only for the IBM PC, XT, jr. and Compatibles

NOW . . . Whether you're working in dBaseII, Lotus 1-2-3, WordStar or whatever . . . You'll have your SIDEKICK®, too!

Something brand new. Crafted in Assembly language as carefully as Borland's famous Turbo Pascal®, so that it's lightning-fast and as compact as only Borland knows how to make it! With a notepad that has a full-screen editor that saves your notes to disk. Then, your applications software can access and use those files.

Suppose, for example, that you're working with a spreadsheet, and you suddenly have an important idea. All you have to do is hit the button, a window opens, you write the note and hit the button again. You're right back where you left off in the spreadsheet. The calculator, the ASCII table and the Metric Converter all work the same way, too.

We designed it because we needed it. If you've ever been writing a report and needed to do a quick calculation or jot down a note, then you understand why.

Circle 49 on inquiry card.
